RAINIER

Tanzite Stone

What's better than Lifetime Warranty?

Tanzite STONEDECKS are made of natural stone, and what can you really do to stone, which is why we warranty it for life.

ABOUT TANZITE

Tanzite STONEDECKS is a Canadian-developed, patent-pending, stone tile decking product. Used to build and resurface decks, stairs, landings, balconies, rooftops, patios and walkways.

Like man-made diamonds, Tanzite is a stone made using incredible heat and pressure. This ensures you get a perfect stone, that is the perfect colour and will last in the harsh outdoors for a lifetime.

Rainier Collection

Rainier Collection offers the durability of porcelain tile and ease of installation. These flexible tiles can cover almost any surface, making them ideal for both indoor and outdoor use. Thanks to our innovative EPDM rubber gasket system, installation is a breeze – no more grout woes. Say goodbye to traditional tiling headaches and hello to the future of easy, elegant flooring. Elevate your space with Rainier Collection's beauty, durability, and longevity now!

The Rainier Collection stays flexible so it can transform any space with ease.

Install over:

Existing outdoor decking

Rooftop patios

New waterproof decking

Patios & walkways on the ground

Existing pavers

Existing tile floors

Concrete, even cracked concrete

Subfloor, even if they flex

How It Works

The foam underlay is already attached to each tile. This means the Tile is insulated from the floor, keeping the floor warmer and softer feeling than a traditional tile. It also allows installation over uneven surfaces, or surfaces that flex.

EPDM rubber gaskets connect the pieces securely together so they interlock, yet remain flexible. This replaces the grout and makes installation easy for any DIY'er.

It also makes the "grout" easy to clean, and makes the tile installation removable, if needed. The flexible connection accepts movement, allowing placement over cracked concrete, flexible floors and outdoors where ice can move the tiles.

Rainier Colors Aged Teak

The beautiful variations of light browns through to medium browns and gray tones make Aged Teak perfect for subtle interest on any modern deck.

American Walnut

This classic dark brown color provides the same richness to your outdoor living space that it has been providing to indoor flooring and woodworking for well over a century.

Carrara Marble

This stone absorbs less sunlight, making it a great choice to keep your deck cooler in the hot sun; yet the finish is not too reflective.

Driftwood

This luring color has a high contrast gray's reminiscent of wood that has won many battles against wind and water throughout its time. It's modern, yet enduring.

Sierra Grey

Like the inspiring cliffs of a grey mountain, this stone has a weathered look layered over layers of greys.

Canyon Brown

Canyon Brown is a warm and inviting brown tone, reminiscent of nature's earthy hues, brings a touch of the outdoors to both your indoor and outdoor spaces.

Slate Black

Slate Black's versatile black tone is designed to complement a variety of colors, making it the ideal choice for creating dynamic and stylish accent with another color or independently to elevate any space.

Travertine

Travertine – a timeless testament to nature's artistry. This pristine white and warm tan fusion, adorned with creamy hues and rustic tones, encapsulates the timeless beauty of the earth.

Unparalleled After Sales Support. If you have any questions, need help, or just want some tips while your building your project we offer free advice from a technician who actually installs Tanzite! Book a video meeting at www.tanzite.com/talk-to-a-tanzite-expert and you can show the technician your specific project to get the best advice!

Score Card

Perform some tests on the products your considering and rate them from 1 (worst) to 10 (best)

	Tanzite	Option 1	Option 2	Option 3
Appearance and coloring: Lay your samples out and rate the colors on realism and overall look. How well do our colors match with the rest of the accents in your house?				
Does it work for all areas of your house: Tanzite can be used as flooring, decking, patio and walkway materials and even concrete overlays. How likely would you be to use this in other areas of your home/ property?				
Can it handle all the interior/ exterior cleaners you normally use: Try using a variety of different cleaners you might use around your house individually on each sample.				
Does it scratch? Take your most hated steak knife in your kitchen (or screw/rock) and try to scratch your samples to mimic years of use.				
Will it melt? Sometimes you can have accidents in the kitchen or with the bbq that involve high heats. Does a hot knife or lighter melt or damage the samples?				
Is it slippery? Lay your samples out and pour a glass of water over them. Do they get slippery when wet?				
Eco friendly score: Does the product contribute to the environment negatively such as deforestation or chemical pollutants?				
Total Score Combine your score from each sample to determine which materials will work the best for your next project!	Out of 70	Out of 70	Out of 70	Out of 70
