

TPS -

Your Trusted Water Quality Test Equipment Partner

At TPS, our heritage as a locally Australian-owned and operated water quality equipment manufacturer dates back to 1968. Over the past five decades, we have grown into a well-known and trusted leader in water quality testing equipment.

With a vision of being at the forefront of innovation, we aim to deliver cutting-edge water quality test instruments and solutions and provide training and support services that promote sustainability and environmental ethics.

Our Core Competencies

As a leading water quality test equipment manufacturer, TPS takes pride in our core competencies that set us apart in the market.

Water Quality Test Equipment

We design, manufacture, and supply reliable, robust, and accurate water-quality test instruments. From our Brisbane factory, we build solutions for testing pH, ORP, conductivity, dissolved oxygen, and turbidity. Used around Australia, our WP Series and 90 FL Series portable field kits have gained widespread popularity for their precision and reliability in tough environments. Clients use our industrial process and dosing controllers for a wide range of applications and ensure regulatory compliance and quality. Time and time again, clients choose TPS products for their ease of use and rugged reliability.

Service and Support

TPS stands behind its products with local service and support, ensuring spare parts are promptly available, and product repairs and maintenance services can be performed quickly. With our Brisbane locality, we are able to minimise disruptions to our client's operations and provide immediate support for sales and equipment enquiries.

Rigorous Quality Assurance

TPS adheres to stringent quality control measures, ensuring all our products meet and exceed client expectations. By maintaining ISO9001 certification, we sustain the quality of our products, resulting in exceptional product longevity and reducing costly downtime.

Comprehensive Calibration and Maintenance Services

We offer onsite calibration services by skilled technicians, ensuring best-practice fleet maintenance and performance. Our programmed maintenance services, either onsite or at our factory, can help extend the longevity and reliability of your equipment.

Annual Factory Service

To support our products, TPS offers comprehensive annual factory service, including thorough inspections, maintenance, and necessary repairs. To simplify the process, we offer fleet management, rental units, and convenient shipping options.

Empowering Training Programs

Our specialised training equips your staff with in-depth knowledge and technical expertise to effectively operate and maintain water quality instruments, leading to a greater understanding of measurement accuracy. The training is open to users of any equipment brand and reduces downtime through practical hands-on instruction.

Rental Solutions

TPS provides flexible rental equipment options, ensuring short-term monitoring, baseline testing, or other specific customer requirements with accurate and verified instruments, directly from the manufacturer.

Locally Based

TPS is owned and has been locally operating from Brisbane, Queensland for over 55 years. Throughout this time, we have consistently advanced our range of products and services, consistently surpassing the expectations of clients, not only across Australia but also spanning the globe. Our commitment to direct support access and swift lead times empowers us to provide optimal solutions to our valued clients.

Our Products and Services

TPS offers a comprehensive range of water measurement equipment and services such as:

- Water quality instruments for pH, ORP, conductivity, dissolved oxygen, and turbidity testing
- WP Series and 90 FL Series portable field kits for professionals in the industry
- Dosing and Process controllers
- Onsite calibration services to support accurate measurements
- Programmed maintenance for prolonged equipment reliability

- Annual factory service, including inspections, maintenance, and repairs
- Rental equipment for shortterm monitoring and baseline testing
- Specialised training programs for staff to maximise instrument benefits
- Calibration buffers and standards for precise readings

Our Leadership Team

Greg Smyth - CEO

Greg Smyth is a qualified and highly experienced leader with a background in Engineering and a proven track record in product and service development across diverse industries, including Mining, Wellness, Medical, Infrastructure, and Government technology. With over 20

years of hands-on expertise, he has demonstrated an unwavering commitment to innovation and has cultivated a strong reputation as a dynamic and growth-oriented leader.

Known for his collaborative and customer-centric approach, he deeply values the dedication of his passionate team, recognising their vital role in driving TPS' remarkable success.
