

CaNibble®

PUNCHES
&
DIES

These punches bite tiny pieces of metal as the CaNibble cuts, they are made with high quality high speed steel. Punches are consumable and dull with use. Each punch offers approximately 450 feet of life.

Along with the punch, the die grips and guides sheet metal to be 'canibble-ised'. Like the punches, these dies are consumable needing replacement every 3-4 punches used. This ensures the operation of the Professional Nibbler is optimal.
