Motorized Honeycomb Blinds Solution

Honeycomb shade is also called organ shade, its inspiration from the most perfect architecture "honeycomb design", the product has outstanding performance in dimming, shading, heat preservation, convenient use. In the middle of fixed cellular static air layer is very thick, completely cut off from the window on both sides of the heat conduction, heat preservation and heat insulation. It has the incomparable function. Different fabric on both sides and the light is filtered and diffused twice, makes the room more comfortable. With special waterproof treatment of different fabrics, you can easily obtain the dimming requirements of all gradients from flexible yarn level to full shading, is an expert in room light control, suitable for use in the room, living room, kitchen, toilet and other environmental conditions.

Honeycomb curtain as a decorative indoor curtain, more and more favored by hotels and high-end residences, it has the following characteristics:

- Heat insulation and heat preservation, air static solid layer formed by holes in honeycomb fabric brings extraordinary heat insulation and heat preservation effect;
- Noise isolation, honeycomb hole can play a good noise isolation effect, create a quiet and comfortable home environment
- Block uv rays, blocking up to 99% uv rays, effectively protect furniture
- Variety of styles, honeycomb curtain fabrics are transparent, semi-transparent, light isolation and other styles: in color, texture and printing rich choice:
- Easy to maintain, the fabric is antifouling and antistatic treatment, usually only need to use a portable vacuum cleaner or wet cloth after wiping.

Features

- Honeycomb shape can contain air, can prevent heat increase in summer and heat loss in winter, the curtain has the effect of sound-absorbing heat insulation;
- Can be made of polyester non-woven fabric, warp knitted fabric, knitted fabric, woven fabric and other materials to meet more personalized needs;
- Fabric with special processing, can be flame retardant, anti-static, anti-ultraviolet, waterproof, anti-oil, antibacterial and other environmental protection functions;
- The rope hide design and neat skirt print make the honeycomb curtain looks more simple, delicate and grace;
- Various of the installation structure, optional conventional open type, up and down with open type, up and down combination of day and night curtain type.

Recommend Motor

Product Name	Product Type	Length	Torque(N.m)/Speed(rpm)	Insulation Grade	Function Description
AM24 mechanical limit drive	AM24 single drive shaft	158.6mm	0.6/34	III	Mechanical limit switch External radio receiver DC power/battery power/solar power
	AM24 double drive shaft	201.4mm	0.8/34		
AM24 electronic limit drive	AM24 single drive shaft	158.6mm	0.6/34		Electronic limit switch Built in receiver DC power/battery power/solar power
	AM24 double drive shaft	201.4mm	0.8/34		
	AM24 electronic limit drive Honeycomb blinds motor	158.6mm	0.6/34
