Eye Mist

- Melaleuca Oil
- Melaleuca Tree Extract
- Aloe Vera Extract
- Caster Oil Extract
- 74 Plant Derived Minerals
- Relieves Dry Eyes
- Relief from Allergens
- Relieves Cataract Symptoms
- Relieves Blepharitis
- Bacterial and Virial Infections

paradisenutrients Eye Mist With the Benefits of Tea Tree Extract

Our Eyes

From birth to old age our eyes are one of the most important organs of the body. It is important to maintain healthy vision and protect the eyes from vision impairing diseases.

This is done through an optimum intake of vitamins, minerals, and nutrients.

These nutrients not only help in maintaining eye health but also improve the clarity of vision. Prevention is always better than cure. It is possible to prevent eye diseases such as cataracts, glaucoma, and macular degeneration through a well-balanced diet rich in nutrients. However, as we age, our bodies lose the ability to fight back because the membranes protecting our eyes get thinner and weaker. So we often need some assistance from products like Paradise Nutrients Eye Mist to maintain protection even from the outside.

In modern times, with excessive use of technological devices, continuous exposure to free radicals in the environment, and poor diet choices, are the main reasons for the increase in eye diseases and disorders.

These problems have always existed. However, in recent years they have increased at an alarming rate, even in young patients.

Aloe Vera

The crystal (inner gel) of the Aloe Vera plant is an ingredient that has been valued for centuries as the basis of hundreds of natural healers, and nutrient support supplements.

Aloe Vera stimulates the formation of white blood cells, promotes the healing of living tissues. It also provides a protective effect on the delicate membranes that cover the eyes. Research shows its extracts have been used as a fundamental part of the treatment of conditions such as dry eyes, cataracts, the weakening of the cornea, Macular degeneration, and Blepharitis amongst other conditions.

Aloe vera is said to provide critical moisture to the skin under the eyes. The delicate skin under the eyes can become dry and irritated from cleansing the skin, sunbathing, dehydration, and medications. Aloe vera gel may help return moisture into the skin because of its humectant capabilities. The gel is said to help keep the skin supple and smooth while providing anti-inflammatory effects that help decrease those puffy under-eye bags.

How Does MATE OIL work?

It has been well documented that Melaleuca oil and tree extracts contain antibacterial and antiviral compounds. These have been proven to win the fight against invading sinus pathogens.

The tea tree oil and tree extracts used in the Paradise Nutrients Eye Mist has been specially treated. Removing volatile compounds that may aggravate the eyes and eyelids.

It also contains anti-inflammatory compounds that reduce the swelling and helps to break down the infected mucus. At the same time attack invading infections, parasites, or pollution.

Paradise Nutrients fuses our specially prepared M.A.T.E. OIL (tea tree oil) and tree extracts with other plant compounds creating a product that gives almost instant relief.

Melaleuca

There are around 140 compounds that make up the extracts from this amazing tree. It has been well documented and researched that Tea Tree essential oil has been used topically as a medical aid due to its anti bacterial, anti-fungal, anti-viral, and anti-mould properties.

Paradise Nutrients Tea Tree oil and extracts used in Eye Mist contains a unique combination of compounds extracted from the Tea Tree called Melaleuca Alternifolia. After the compounds and oil have been extracted it then goes through a special process making it safe to use in the human body.

Tea tree is an essential oil and can be used topically without diluting. It can be very strong and is not recommended when using this oil on sensitive areas of the body. However, when the harder compounds have been removed and fused with other plant compounds it gives a much softer relief.

Castor Oil

Castor Oil can effectively treat mild to severe dry eyes. It is also anti-inflammatory and is used in the preparation of certain anti-inflammatory eye drops. Topical application of castor oil on the eyes and the skin around them, helps the eyelashes grow long and keeps the skin around the eyes moisturized and may reduce wrinkles. The Caster oil used in the Paradise Nutrients Eye Mist is certified organic. It has been fused with the other plant derived compounds to make an effective soothing treatment and rinse.

Long hours of watching TV, working on computers, reading books, and usual daily chores, can make our eyes feel weary and tired. Castor oil eases the eyes providing fast relief and relaxation.

Eye infections are common once in a while. Be it a burning sensation, redness, pink-eye, and they are all either caused due to inflammation or non-inflammatory infective bacteria.

Cataracts can pose to be a serious problem when left untreated. The later stages of cataract make the problem itself hard to resolve. So, use castor oil to dissolve the cataract in the earlier stages itself and beat the problem at its root

Dry eye is a condition where there is a lack of lubricant in the eye causing blurred vision at night, eye pain, blurred vision after long work hours on the computer, etc.

Just a simple eye misting with the Paradise Nutrients Eye Mist may be all you need for relief.

Sea Minerals

The Sea Minerals in Paradise Nutrients Eye Mist are accumulated from a combination of seawater and sea plant extracts, stored as carbonate salts and plant derived minerals.

PN Sea Minerals contains 74 trace minerals and carries oxygen that is freely released. Assisting the other plant compounds to be carried through the body and cavities providing both energy and healing.

According to studies the exacerbation of chronic sinusitis is often polymicrobial, with anaerobic bacteria predominating.

Plant derived minerals are by far the most bioavailable minerals to the body. Metallic minerals that have not been through photosynthesis or the plant factory.

Plant derived minerals are known as colloidal minerals and pass through cell walls assisting the body at a cellular level.

Paradise Nutrients sea minerals have been tested for heavy metals and are extremely safe.
