Horse Immune Oil

***An Immune Boosting Oil To Help Your
Horse Cope With A Challenged
Immune System***

Horse Immune oil

May assist with:-

- Reducing free radicals formed in the body
- Decreasing free radical damage
- Maintaining and supporting wound healing
- Maintaining and supporting immune system health
- Maintaining and supporting a healthy immune system function
- Maintaining and supporting joint health

Formulated as a feed additive from:-

- Melaleuca Alternifolia Tree Extract
- Rice Bran Oil
- Canola Oil
- Olive Oil
- Soybean Oil
- Sunflower Oil

Horse Immune Oil

Horse Immune Oil is a combination of natural vegetable oils and plant extracts designed to assist your horses immune system when it has been breached or compromised.

Horses are exposed to the element every day and are constantly subject to attack from biting insects like mosquitos, sand fly's and midges among others. As result of this exposure your horse may be suffering from a number of diseases like bacterial or viral infections affecting your horses performance.

Horse immune oil has been designed as a feed additive to help both boost and support your horses immune system internally.

Clinical observations have shown horses that receive Horse Immune Oil increase endurance and recover from many undiagnosed symptoms.

Melaleuca Alternifolia

There are around 140 compounds that make up the extracts from this amazing tree. Traditionally Melaleuca Alternifolia has been used topographically as a medical aid because of its anti-bacterial, anti-fungal, anti-viral, and anti-mould properties.

The Tea Tree ingredient in Horse Immune Oil contains a unique combination of compounds extracted from the Tea Tree called Melaleuca Alternifolia. These extracted compounds are from the whole Tea Tree leaf, not just the oil. Through a unique process, PN makes it into a safe consumable food grade extract.

The benefits from Tea Tree are numerous as it has been proven to contain certain compounds and minerals that support a healthy immune system. It is thought that many Viruses, Bacteria, Fungus, and Mould can camouflage themselves from the immune system. This is where Immune Oil may assist by exposing them to the immune system.

Olive Oil

Olive oil contains good amounts of Omega 3 fatty acids and also Omega 6 fatty acids that are helpful in boosting memory power and is good for the brain.

Olive oil contributes in strengthening bones as it helps in developing higher levels of osteocalcin in the blood which indicates a healthy bone formation in the body.

Olive oil contains a great amount of Vitamin E and also antioxidants which help in protecting the skin. It helps in delaying the signs of ageing.

Rice Bran Oil

Rice bran oil is one of the ingredients in our Horse Immune Oil. It is naturally higher in phosphorus than calcium, so manufacturers of high-quality rice bran will add calcium, thus not affecting the calcium and phosphorus balance of the base ratio.

Because of its high fat content, rice bran provides alpha-linolenic acid (omega-3) and linoleic acid (omega-6), essential amino acids that need to be supplied through a horse's diet.

Canola Oil

The health benefits of canola oil include its ability to improve heart health, lower cholesterol levels, strengthen cell membranes, boost energy levels, keep the brain functioning at a high level, and prevent the onset of diabetes. This oil also promotes skin and hair health. It may also reduce the risk of cancer.

Canola oil is a storehouse of nutrients including various vitamins such as Vitamin E and K, and lipids including total saturated fatty acids, polyunsaturated fatty acids, and total trans. Canola oil contains zero cholesterol and is a good source of energy.

This oil prevents aching joints and stiffening of bones as a result of old age and wear-and-tear. It is also good for the treatment of arthritis, and other inflammations caused by respiratory or digestive disorder.

Sun Flower Oil

Sunflower oil, rich in Vitamin E, is considered by many to be important in improving regenerating cells. This means the skin or hide is better protected against damage from the sun, as well as the natural degradation that comes with age. These are changes that occur when free radicals are present in the body. Antioxidants, like Vitamin E, neutralize free radicals, keeping them from destroying or damaging healthy cells. You can see an increased reduction in scars, and quicker wound healing,

Sunflower oil has anti-inflammatory qualities, which are derived from its mineral and vitamin content, as well as the beneficial fatty acids it contains. anti-inflammatory properties, and the reduction of respiratory conditions

The fatty acid content in sunflower oil is connected to energy levels in the body. Saturated fats can make you feel sluggish, while unsaturated fats, which this oil has many, can keep your horse energized for much longer.

Soybean Oil

A glass bottle of soybean oil is the central focus, filled with a clear, golden-yellow liquid. The bottle has a handle and a cork stopper. It is surrounded by a large quantity of soybeans, some whole and some cracked, scattered on a wooden surface. In the background, there are several burlap sacks, suggesting a farm or processing facility setting. The lighting is warm and natural, highlighting the texture of the beans and the clarity of the oil.

The health benefits of soybean oil include its ability to improve your heart health, lower your cholesterol, improve the immune system, reduce cognitive disorders, prevent osteoporosis, and improve growth, while also boosting eye and skin health.

Soybean oil is considered healthier than most other vegetable oils, due to the presence of a good variety of essential fatty acids, which the body needs in order to remain healthy. There are also a number of plant sterols in soybean oil, which can have a wide variety of health benefits on animals who have soybean oil in their diet. The vitamin and mineral content of soybean is what gives this delicious and widely useful legume its fame.

Immune System Compromise

There are many things that can compromise a horse's immune system. A horse's immune system is designed to protect a horse from invading pathogens such as bacteria, mould, fungal disease, and viruses among other things.

A horse's immune system is extremely complex. When everything is functioning in synchrony, the system works well. The problem is that many things can compromise the immune system, and when that happens your horse can be affected.

When a horse is stressed, lacking in nutrition or aged, the immune system can become easily compromised and pathogens are able to breach the immune system causing the horse to become ill or affected by viruses and bacteria.

Original Quality and Safety

The Tea Tree oil and Melaleuca extracts used in Paradise Nutrients products is from the finest quality tea tree oil found anywhere in the world. Our oil is a genuine product, free from any harmful chemicals, additives, or synthetics. Grown "As Nature Intended"

Our products come from an area in Australia where the Mother Trees are still standing. These trees have been tested to be over 1000 years old. The compounds in these trees and their offspring where to oil comes from contains the original DNA which guarantees original quality and superior strength of the extracts.

It is also well documented that Tea Tree Oil contains some volatile compounds composed of terpene hydrocarbons, mainly monoterpenes, sesquiterpene, and their associated alcohols. Terpenes are volatile, aromatic hydrocarbons and may be considered polymers.

These volatile compounds are extracted through a special process without affecting the quality of the active ingredients needed to assist and support the immune system via superfoods and food grade ingredients.

The Environment

Our tea tree extracts are grown in rich alluvial soil, nestled within the confines of this natural habitat which beams with native wildlife.

This is what gives our oil and extracts its purity and superior quality, seldom found in other oils.

By cultivating, harvesting, and distilling our oil directly on the plantation, we have the unique capability to guarantee perfection at every step of the process.

This wonderful natural oil is grown amongst the best that Australian nature has to offer in a clean, green environment. There are no factories, no pollution, no hustle and bustle, just the sweet smell of the forest and tea trees.

We keep our carbon footprint minimal and practice sustainable agriculture. We also protect the native animals that inhabit this distinct region, from the resident emus that live amongst the rows and rows of tea tree to the koalas that keep a watchful eye from the bordering native gum trees.

PN Horse Immune Oil

Application

For horses mildly immune challenged add 50ml of PN Immune Oil to your horses feed or syringe over the back of horses tongue for 10 days.

For extremely immune challenged add 100ml of PN Immune Oil on feed or syringe over the back of horses tongue for 5 days and 50 ml for the next 10 days.

For best result after administering Horse Immune Oil give horse PN Probiotic Tonic for 5 days to assist your horse good gut bacteria.

PN Horse Minerals will assist with long term immune building and your horses general wellbeing.
