

Naturally Australian Tea Tree Oil

Naturally Australian Tea Tree Oil produces the finest quality tea tree oil found anywhere in the world. Our oil is the genuine product. Free from any harmful chemicals, additives, or synthetics. Grown "As Nature Intended".

- ✓ Anti-Viral
- ✓ Anti-Bacterial
- ✓ Anti-Fungal
- ✓ Anti-Mould

Don't Settle For Second Best

Natures Medicine Kit In A Bottle

Age Old Benefits

For thousands of years, Indigenous Australians have known the health benefits of tea tree oil using tea tree as an antiseptic for skin conditions. The leaves were crushed and applied as a paste to wounds and skin abrasions.

Oils from the crushed leaves were also used to treat sore throats and coughs. Today, widely recognised as a genuine natural healer, tea tree oil is a powerful antiseptic, anti-viral, and fungicidal substance.

Safe for an enormous range of different cosmetic and medicinal uses, tea tree oil takes its pride of place amongst the wonderful world of essential oils and the many health benefits associated with it.

Original Quality and Safety

The Tea Tree oil and Melaleuca extracts used in Paradise Nutrients products is from the finest quality tea tree oil found anywhere in the world. Our oil is the genuine product. Free from any harmful chemicals, additives, or synthetics. Grown "As Nature Intended"

Our oil comes from an area in Australia where the Mother trees are still standing. These trees have been tested to be over 1000 years old. The compounds in these trees and their offspring where to oil comes from containing the original DNA which guarantee's the original quality and superior strength of the tea tree oil.

The gentle steam releases the aromatic molecules from the plant leaves and the steam forces open the pockets of oil inside the plant. The molecules of these exquisite oils then escape from the plant and evaporate into the steam. The steam now contains the essential oil and is passed through a cooling system to condense the steam. This forms a liquid from which the essential oil and water are then separated.

The Environment

Our tea tree oil is grown in rich alluvial soil, nestled within the confines of this natural habitat which beams with native wildlife. This is what gives our oil and extracts its purity and superior quality, seldom found in other oils. By cultivating, harvesting, and distilling our oil directly on the plantation, we have the unique capability to guarantee perfection at every step of the process.

This wonderful natural oil is grown amongst the best that Australian nature has to offer in a clean, green environment. There are no factories, no pollution, no hustle and bustle, just the sweet smell of the forest and tea trees.

We keep our carbon footprint minimal and practice sustainable agriculture. We also protect the native animals that inhabit this distinct region. From the resident emus that live amongst the rows and rows of tea tree to the koalas that keep a watchful eye from the bordering native gum trees.
