## Nasal Mist

- Melaleuca Oil
- Melaleuca Tree Extract
- Aloe Vera
- 74 Plant Derived Minerals
  
- Relieves Sinusitis
- Removes Sinus Polyps
- Relief from Allergens
- Bacterial and Virial Infections
- Relieves and Soothes

# Sinus Relief

Headaches, congestion, sinus pressure, facial tenderness, cough and fever are all symptoms of a sinus infection. The infection can be triggered mainly by virus. However, can also be caused by bacteria, mould, pollens or fungus.

The sinuses are small air filled cavities in the skull and are connected to the nasal airways. Humans have 4 pairs of sinus cavities. The main role of the sinus is to produce mucus to assist in discharging things like bacteria, viruses, dust, allergens or pollution.

When this happens our nasal passage and sinuses get inflamed and cannot discharge these unwanted pathogens. While the body keeps on producing mucus to flush out these unwanted pathogens. Inflammation builds up, and the nasties become an infection causing damage to your cells.

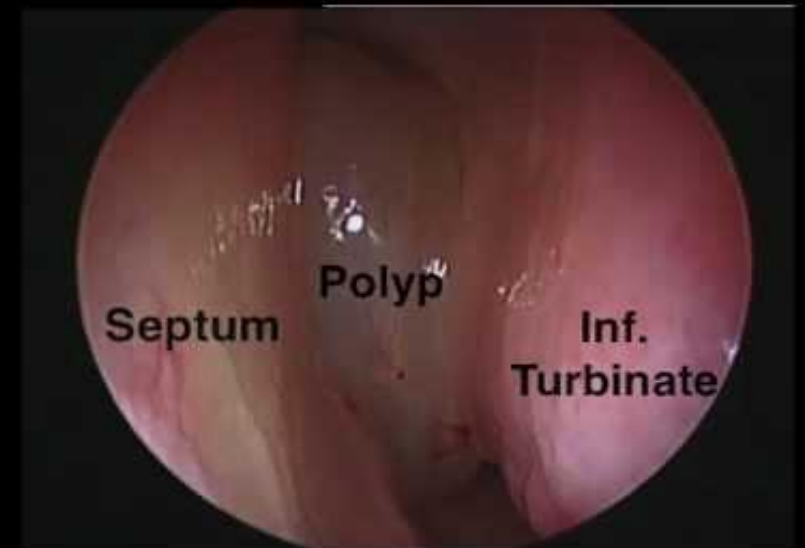

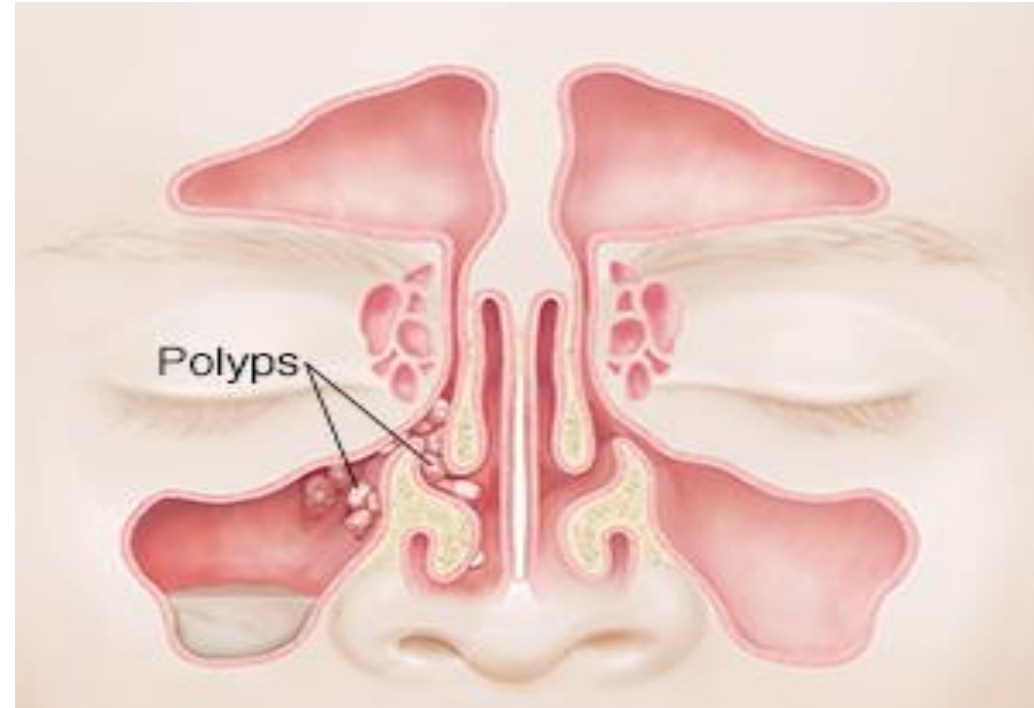

# Nasal Polyps

Polypoidal masses are also known commonly as nasal polyps. These are small benign growths that you will see around the nose edge and are quite uncomfortable for many people. They can vary in different sizes and cause inflammation of the sinuses. They are normally described as jelly like, grape shaped extra growths on the nose edges that have a grey, yellow or pink hue to it.

One of nature's best known remedies to treat nasal polyps is tea tree oil. It can be used alone, but is not recommended as it is very strong.

When used in a combination with different other natural ingredients, it can provide relief from nasal polyps as well as to prevent the recurrence of polyps.

If you are concerned about the nasal polyps, you should consult your health care practitioner.

## How Does MATE OIL work?

It has been well documented that Melaleuca oil and tree extracts contains antibacterial and antiviral compounds. These have been proven to win the fight against invading sinus pathogens.

The tea tree oil and tree extracts used in the Paradise Nutrients Nasal Spray has been specially treated. This removes volatile compounds that may aggravate the sinus and nasal passage.

It also contains anti-inflammatory compounds. Reducing the swelling, and helps to break down the infected mucus and at the same time attacks sinus invaders.

Paradise Nutrients fuses our specially prepared M.A.T.E. OIL (tea tree oil) and tree extracts with other plant compounds. Enhancing these compounds, which gives almost instant relief.

# Melaleuca

There are around 140 compounds that make up the extracts from this amazing tree. It has been well documented and researched that Tea Tree essential oil has been used topically as a medical aid due to its anti-bacterial, anti-fungal, anti-viral, and anti-mould properties.

Paradise Nutrients Tea Tree oil and extracts used in Eye Mist contains a unique combination of compounds extracted from the Tea Tree called Melaleuca Alternifolia. After the compounds and oil have been extracted it then goes through a special process making it safe to use in the human body.

Tea tree is an essential oil and can be used topically without diluting. It can be very strong and is not recommended when using this oil on sensitive areas of the body. However, when the harder compounds have been removed and fused with other plant compounds it gives a much softer relief.

# Aloe Vera

Aloe Vera Extract. Aloe Vera contains over 200 plant compounds. Many studies showing Aloe Vera has the following benefits.

---

- Rich in vitamins & minerals
- High in essential fatty & amino acids
- Possesses strong odontogenic properties
- Helps with digestive process
- Support the cardiovascular system
- Boosts the immune system
- Reduces inflammation
- Increases the body's alkalinity
- Improves the metabolism & facilitates
- Moisturizes and lubricates the skin
- Rids the body of harmful toxins
- Fights bacterial, viral & fungal infections

## How It Works

The Aloe Vera used in Paradise Nutrients Nasal Mist is Australian grown and is certified organic.

Aloe Vera provides good results when it comes to reducing inflammation of the lining of the bone cavities that communicate with the nose and it speeds up the healing of sinusitis. In addition, it will also help to combat nasal packing which in most cases prevents rest and sleeping well at night.

Aloe Vera concentrate can help us ward off other diseases. Assisting our immune system to destroy bacteria and viruses, and helping to protect the function of our cell membranes.

A 2014 study shows that Aloe Vera has proved to be a natural antiseptic, anti-inflammatory, antiviral and antifungal plant. It is very good in building up the immune system without causing allergic reactions or side effects.

# Sea Minerals

The Sea Minerals in Paradise Nutrients Nasal Spray are accumulated from a combination of seawater and sea plant extracts, stored as carbonate salts and plant derived minerals.

PN Sea Minerals contains 74 trace minerals and carries oxygen that is freely released. Assisting the other plant compounds to be carried through the body and cavities providing both energy and healing.

According to studies the exacerbation of chronic sinusitis is often polymicrobial, with anaerobic bacteria predominating.

Plant derived minerals are by far the most bioavailable minerals to the body. Metallic minerals that have not been through photosynthesis.

Plant derived minerals are known as colloidal minerals and pass through cell walls assisting the body at a cellular level.

Paradise Nutrients sea minerals have been tested for heavy metals and are extremely safe.
