

paradisenutrients Spray Clean

Non Toxic Eco Friendly Cleaning Product

Commercial and domestic cleaning product that will clean almost everything that you want with just one cleaner.
Engineered from the best ingredients nature can offer.

MULTIPURPOSE CLEANER

Spray Clean is the wonder product you have always been looking for. Spray Clean is so universal that you can use it on just about anything you want to clean. From around the home, in the shed, and commercially. It is one of those products that make you say “wow” when you see it work.

Spray Clean is more than just a multi-purpose cleaner. It deodorises, sanitises, and works as a deterrent against cockroaches and other unwanted nasties. It is ideal for use in the home, office, BBQ, workshop, cars, boats, and even machinery.

Spray Clean is a must for every household and should be in every home and office. Spray Clean is plant derived.

Use as a degreaser, general cleaner, oven cleaner, and glass cleaner. In fact, can be used in every aspect of cleaning. This product is supplied as a concentrate. Simply mix the correct amount with clean water and use. After Spraying onto the area you want to clean just give a gentle rub with a brush or cloth and see the results.

Environmentally Sensitive

When it comes to detergents and cleaners, the Australian Standards AS1792 states that 80% of the product must break down in the environment within 21 days. Paradise Nutrients cleaners are formulated and designed in Germany to comply with the O.E.C.D. screening test 301E (1981) is even more stringent, **90%** must breakdown within 21 days.

Because highly biodegradable detergents and raw materials are costly, the majority of companies are not using them. There is only a recommendation to use them, not a law, and it applies only to the surfactant (soap part of a detergent), not all the ingredients.

By using the highest grade of materials gives Paradise Nutrients cleaners two distinct advantage points. We have a superior quality product and a safe product that will not harm the environment.

Safe for you and your loved ones, especially if you or someone in your family is chemically sensitive.

SAFETY AND QUALITY OF PRODUCTS

Paradise Nutrients is always updating our range of products with the latest research and innovations.

The EU has one of the world's highest standards for cleaning products aimed for being both user friendly, environmentally friendly, safe, and plant based.

Our products are formulated to be multi-functional, so they are intended to be utilized for multiple cleaning tasks. We do this because of our 30 years experience, we understand the needs of cleaners. Our product development partners and production site is certified according to the European Eco-Management and Audit Scheme – EMAS (Registration No. DE-S-1 55-00049). The integrated management system of Div. FUN comprises of:-

- Quality Management System (ISO 9001)
- Environmental Management System (ISO 14001)
- Safety Management System (ESH-Management – Environment, Safety, and Health)

How it Works

Most cleaning products are from surfactants.

Many manufacturers use synthetic surfactants as they are cheaper. Paradise Nutrients cleaning products are made purely from plant derived surfactants. These surfactants are very smart, natural chemicals that have two opposing ends. One end of the chemical is soluble in water and the other in fat. Hence, a surfactant can help mix oils and waters which would normally sit on top of one another.

When you have a liquid sitting on top of an oil, there's a lot of surface tension. Surfactants, by mixing the two, can reduce this surface tension, helping to wash away oily and water-based stains.

Paradise Nutrients uses carefully chosen plant derived surfactants in our cleaning products. We use a blend of surfactants that have a positive or negative charge' and this helps the dirt and grime compounds to separate and stay separated while in suspension. This helps the surface to stay clean without the dirt or fat compounds to re-stick to the surface ending in a cleaner surface.

Before

After

HOW DOES IT WORK?

As a Degreaser

Floors such as quarry, ceramic tiles, terrazzo, concrete, marble, etc. Painted walls, greasy surfaces, carbon-based cleaning like as soot, smoke, showers, swimming pools, factories and industrial workshops.

Kitchens, ovens, rotisseries, exhaust fans, tar, grease, mag wheels, car engine's grease & grime, remove road film, and as a bug off remover from the car body without damaging.

HOW TO USE Spray Clean for Degreasing

Dilute 1 part : 3 to 5 parts water.

Kitchens, ovens, rotisseries, exhaust fan, car engine's grease & grime, mag wheels, greasy marks and stains.

Apply Spray Clean solution using a spray bottle. Leave to soak 5 minutes, use a sponge or scourer and wipe clean.

HOW DOES IT WORK?

As a Heavy-Duty Cleaner

Floors: quarry, ceramic tiles, concrete in food processing, and automotive industry.

Apply by spray or mop. Scrub with rotary machine or lightly scrub with mop, brush or scourer. Mop or wipe clean.

Heavy duty: 1 part Spray Clean: 10 to 15 parts water.
(50ml – 75ml to 500ml)

For heavy grease 1 part Spray Clean 5 parts water.
(100ml to 500ml of water)

HOW DOES IT WORK?

As a Spray and Wipe

Light duty: 1 part Spray Clean: 30 to 50 parts water.
(10ml to 500ml)

Use hot or cold water to dilute if scrubbing.

High pressure washing.

Light mixture on most washable surfaces.

Soaking cleaning cloths, metal parts or utensils.

Cleaning windows

You don't have to settle for second best to save money when cleaning. Step-up to the new level in Cleaning Detergents & Soaps.

I have been using your Spray Clean for a while now and I just have to let you know that I am loving this product. I have been doing house and business cleaning for years and this one product does so much.

Every time I do a new home, I get complimented thanks to Spray Clean. This one product can do windows, walls, floors and even in the wash.

Great for anyone who has a mechanic or does dirty jobs in the house. Spray onto greasy work clothes and wash (with PN's laundry care products of course).

Love your stuff PN.

Lisa C. QLD

Spray Clean:

We had been using PN Spray Clean for interior cleaning around the home, when it came time to spring clean the exterior, (We live on a very busy road so the exterior of the home gets very dirty) in the past we had used a harsh chemical bleach combo to clean the white walls of the house. This time we used a mid strength PN Spray Clean solution, the results are outstanding and no chemicals.
