Odour Rid

Benefits include:-

- Kills bacteria
- Absorbs bad smells
- Neutralises all pet odours
- Non toxic ingredients
- Eco sustainable
- Biodegradable
- Septic safe

Non Toxic Odour Absorber & Neutraliser

Paradise Nutrients Odour Rid is an Ultra Concentrate Odour Absorber, Odour Neutralizer, Air Freshener, & Neutraliser.

This unique concentrated formula is designed to get to the source that causes the odour and kills the bacteria, there for neutralizes and eliminates the source.

Pet Odour Rid will eliminate extreme pet odours such as body odours, urine odours, smelly beds, kennels, dung odours, waste from pet foods and more.

Pet Odour Rid is ideal for use in all areas where there are odour problems from pets. After Pet Odour Rid has done its job it will leave the area treated with an exotic rainforest smell.

# How it works

PN Pet Odour Rid is an odour absorber and neutraliser that uses a combination of compounds and natural chemistry to attack the volatile organic compounds which produce odours.

Pet Odour Rid has been specially designed to target many of the bacteria's associated with pets and pet waste including dung and urine.

It is important to remember that pets were once native animals and still have some of their natural instincts in them. Some pets, cats, dogs and other small furry creatures have not forgotten how to mark their territory or bed. You may not see it happen but your pet may still want to mark their territory just like the wild days and this can result in the odours in their beds, your carpets and many other places.

The secretions from a pup's anal glands smell pretty horrific to humans, but they're like secret messages written in the air to dogs. That's why they smell each other's back ends, because doing so tells them everything they need to know about each other! Dogs use these glands to mark their territory too. So another dog that happens to come along will know someone else has already claimed the yard or house.

Cats urinate to leave the same message. This where PN Pet Odour Rid comes into its own. It kills the bacteria that the pet leaves behind and instantly releases the smell produced by the bacteria. The Rain Forest scented deodoriser replaces the smell making it more accommodating to share the same room.

## Mixing Instructions

Pet Odour Rid comes in a concentrated form.

The most economical option is to only mix what you need. However you can mix a larger quantity in a storage container and store it in a dry, clean area out of direct sunlight.

Mixing is very simple. Add 1 part Pet Odour Rid to 5 parts water for heavy odours and 1 part Pet Odour Rid to 10 parts water for general use.

To protect our environment discard any empty container in a correct and responsible manner.

**Safety:-** Keep out of reach of children.
