Capture Images to USB Drive	30x Optical	DisplayPort & USB Outputs	Includes Imaging Software
No PC Required	Up to 300x Digital	1080p High-Res Imaging	Annotate & Measure

Save images and video, no computer required!

Cutting-Edge Technology Meets Comfortable Viewing

Aven's SharpVue Plus combines cutting-edge technology with comfort and ease of use. The SharpVue Plus has carried over all the popular features of the original SharpVue system, such as the attractive compact design and its fixed 9-inch working distance. This new model also retains the dual USB/DisplayPort outputs to connect to either a PC or an HD monitor. The SharpVue Plus's revamped camera offers improved image quality at up to 30x magnification, with a DisplayPort output that provides a real-time 1080p HD video image with little-to-no lag time. While users can still utilize the SharpVue's software for image and video capture, the SharpVue Plus now features a USB port for saving images to a USB drive, no computer required.

Features:

- 30x optical, up to 300x digital magnification
- DisplayPort and USB output
- Built-in LEDs with On/Off switch
- Fixed 9-inch working distance
- Auto focus camera
- Includes remote control for on-screen settings

Cutting-Edge Technology Meets Flexibility

The SharpVue® XT camera is mounted to a telescoping arm with a **horizontal range of 6in to 16.5in**, giving users the ability to adjust the camera position both horizontally and vertically. This innovative feature allows users to upgrade their magnification or working distance, as well as scan over larger objects. The SharpVue® XT utilizes the same advanced camera technology as the SharpVue® Plus with the same USB/DisplayPort outputs and the ability to save images to a USB drive. This system comes complete with an ESD Safe **22in post stand with a 11.5in x 17.7in base**. Equipped with cutting-edge software that allows users to capture images and videos, make accurate measurements, draw lines and shapes, and more.

Features:

- 30x optical, up to 300x digital magnification
- DisplayPort and USB outputs
- Adjustable vertical and horizontal positioning
- Auto focus camera
- Includes remote control for on-screen settings
