Autograph

ALIGNERS

Autograph - an aligner system exclusively for orthodontists.

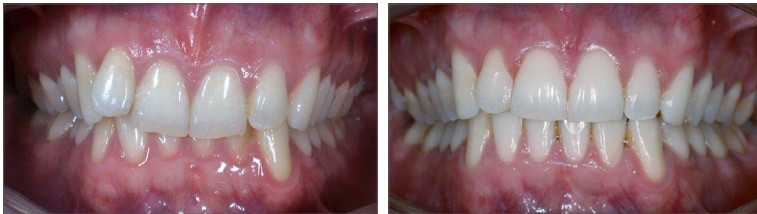

DB Orthodontics is pleased to introduce Autograph, an innovative aligner system developed exclusively for orthodontists.

Orthodontic patients are increasingly requesting alternatives to fixed conventional braces. To help meet this demand, DB Orthodontics has developed Autograph.

We have worked closely with a team of orthodontists to ensure our aligners meet the rigorous requirements of the specialist. As a result, Autograph Aligners guarantee a predictable and successful clinical outcome, while providing a positive patient experience.

Go with the flow...

DB Orthodontics is pleased to announce its latest high quality bondable tube: the Evolve *Flow*. Designed in conjunction with leading orthodontists, Evolve *Flow* is low profile whilst still retaining the functionality required of a molar tube. Available now in Roth and MBT. 2nd Molars coming soon.

Low Profile Hook

Low profile hooks guarantee patient comfort and allow for easy placement of attachments.

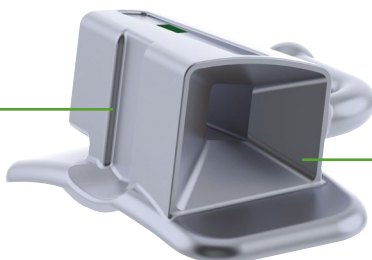

Low Profile

The contoured surfaces are low profile and tapered for patient comfort.

Positioning Guide

Occlusal /Gingival positioning guides ensure a secure grip and ease of placement.

The Funnelled Entrance

The Evolve Flow funnelled entrance allows for easy wire insertion.

Contoured Base

Anatomically contoured base with occlusal indent ensures accurate fit, whilst the 80 gauge mesh pad ensures superior bond strength.

Distal Notch

Evolve Flow features a distal notch for ligation and tieback of auxiliaries.

Identification Marks

Each tube is colour coded on the facial surface for easy molar quadrant identification.

Aesthetic Micro Coated Archwire

Micro-Coated Aesthetic Archwires - only coated on labial surface.

Micro-Coated Aesthetic Archwires - A huge advancement in coated wires providing an optimum cosmetic appearance.

Micro-Coated Archwires will reduce friction and improve sliding mechanics compared to fully coated wire.

Micro-Coated Archwires achieve a true archwire size as the PTFE coating is only .0005".

The coating is resistant to staining and cracking even if the archwire shape is changed.

All Micro-Coated Archwires are individually packaged and sealed in an autoclavable pack to protect your patients from cross infection.

Micro-Coated labial surface provides an optimum cosmetic appearance.

Pack size: 10. All sizes available.

ISD900 Cordless Screwdriver

We recommend the ISD900 cordless screwdriver for use with the Infitas mini implant system mini components for palatal and difficult access insertion sites. The ISD900 will guarantee precise torque control due to the unique NSK torque calibration system which is extremely easy to use.

The ISD900 is very quiet and smooth running, patient friendly, lightweight and easy to handle due to the extension arm which enables the user to avoid lateral movements during insertion.

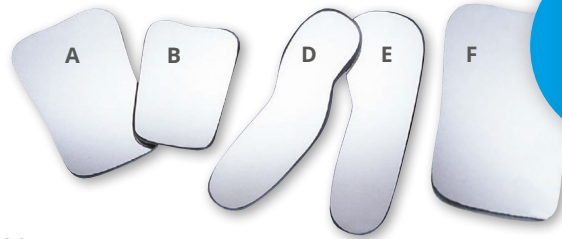

Photographic Mirrors

High resolution intra-oral photos depend on superior reflective mirrors. We offer four styles that give you unparalleled access to all intra-oral regions.

These mirrors have a solid chrome coating on 3mm transparent glass, which is the best choice for

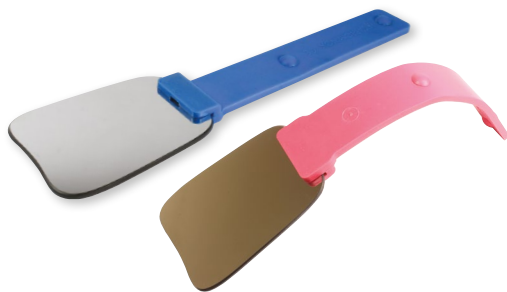

photography, providing higher reflectance for sharper, precise images with 35mm and digital photography.

These mirrors withstand repeated steam and autoclave sterilisation. Sterilise at 134-137°C.

Overview of Systemized & Effective Orthodontic Care

20th - 21st May 2016 at The Royal College of Physicians, London, UK

About the Programme

Over the years, Dr. McLaughlin has developed and presented the following seven courses:

1. Orthodontic Treatment Mechanics and the Pre-adjusted Appliance
2. Diagnosis, Treatment Planning and Treatment Mechanics
3. Inter-Arch Treatment Mechanics-Part1-Class II Treatment
4. Inter-Arch Treatment Mechanics-Part2-Class III and Asymmetrical Treatment
5. Management of the Dentition
6. Occlusion and the TMJ in Orthodontics
7. Surgical-Orthodontic Treatment

This 2 day course will provide an overview of these seven topics. Difficult cases of interest from each of the above mentioned courses will be presented, and an overview of the treatment philosophy and mechanics will be explained. The versatility of the mechanics and the effectiveness of treatment of malocclusions will be demonstrated.

The course is also intended to provide an overview of current "hot topics" and advice on many of the challenges facing today's orthodontist at all levels. The course will provide an in-depth overview of the McLaughlin-Bennett System 4.0™ treatment philosophy.

Book your course place via freephone

0800 7833 552

or book online at www.dbortho.com

Dr. Richard McLaughlin

Dr. McLaughlin

Dr. Richard McLaughlin completed his orthodontic training at the University of Southern California in 1976. Since then he has been in the full time practice of orthodontics in San Diego, California.

He has lectured extensively in the United States as well as internationally. He is a member of the Pacific Coast Society of Orthodontists, the American Association of Orthodontists, and a Diplomate of the American Board of Orthodontics.

He is the Component Director of the Southern California Component of the Edward H. Angle Society of Orthodontists and is presently serving as President of the National Angle Society.

**For those who have already registered at the early bird rate of £600.00, we are offering a refund of £150.00 or credit of £200.00 redeemable against Opal Orthodontics products.*
