

### Twist-Lock Systems

The SPECTRUM Twist-Lock range of single and double head point-of-use (POU) systems and cartridges represent a functional and design evolution for POU applications.

Designed for single use or in parallel offering multiple filter combinations, the SPECTRUM Twist-Lock range of cartridges deliver outstanding performance and flexibility. Suitable for a wide variety of applications from vending to potable water, they are an ideal solution for point-of-need applications.

The unique patented twist and lock cartridge connections ensure a reliable and leak-free system, whereby a simple quarter turn automatically shuts off the inlet and outlet water channels, allowing trouble free maintenance without the need to turn off water lines.

**SPECTRUM™**

**Stylish and simple, single and double head Twist-Lock POU systems**

**38°C**

**0.2 5 1**

**6.9 bar**

**1/4"**

**Key product features**

- **PTL-S** - Sediment cartridge for particulate removal
- **PTL-CB** - Carbon block cartridge for chlorine, taste and odour removal
- **PTL-HF** - Hollow fibre membrane for bacteria, cyst and virus removal

Average rejection rate:

- bacteria 99.9999%
- cyst 99.99%
- viruses 99%

- **PTL-RO** - Reverse osmosis membrane

Average rejection rate: 97%

Max TDS: 2,000 ppm  
pH range: 4 - 10

**Accessories**

PTL-FH1

PTL-FH2
