ISSUE DATE: August 09, 2023
PAGE: 1 of 8
REVISED2 DATE: Oct 07, 2023

Applicant : TABLEWORX DINING CONCEPTS
Contact: : KAMAL SINGH ARYA
Address : 50, 20/21 PIAO MANYARI, NARELA ROAD, KUNDLI, SONEPAT-131028
Tel : 9811946696
E-mail : coordinate@fabrinnox.net
Sample Description : 2 EACH
Buyer : Not provided
SKU NO : Not provided
Style Name : CASCADE SALAD FORKS, MARQUIS TEA SPOON, GENEVA DINNER FORKS
PO no : Not provided
End use : DINING
Factory : /
Size : Not provided
Color : GOLD / BLACK / ROSE GOLD
No of samples : 06 pcs
Country of Origin : INDIA
Date of Submission : June 30, 2023
Test Performance Dates : June 30, 2023 to August 09, 2023

TEST RESULT SUMMARY

Test Requested	Results
Dishwasher Exposure (H-41014)	PASS (See Test Results)

Test Results

Evaluation	Citation/Method	Criteria	Results
Dishwasher Exposure	H-41014	Shall exhibit no surface degradation such as cracks, color fading, scratches, or deformation such as warping after 500 cycles .	<p>PASS No any visual changes observed after 150 dishwasher cycles (See Remark #04) SAMPLE A, B & C</p> <p>PASS No any visual changes observed after 300 dishwasher cycles SAMPLE A, B & C</p> <p>PASS No any visual changes observed after 400 dishwasher cycles SAMPLE A, B & C</p>

EXHIBIT #05 SAMPLE A, B & C AFTER 400 DISHWASHER CYCLES

REMARK

- 1- The listed test is conducted as per vendor's request.
- 2- This report is generated in our local format and is for vendor's reference only.
- 3- The test requirements provided by the vendor.
- 4- Test report has been issued after 150 dishwasher cycles as per vendor request

REVISED1 PROPERTY: Test results for dishwasher test after 300 cycles included in test report as per vendor request

REVISED2 PROPERTY: Test results for dishwasher test after 400 cycles included in test report as per vendor request

NOTE:

Test uncertainties not reported are at client's disposal, for those in which it is possible to evaluate or estimate the test uncertainty. The statement of conformity is based on a 95% coverage probability for the expanded uncertainty of the measured result (guard band):

Rule 1:

For any requirement state to be "Maximum"

PASS - The measured result is below a specification limit minus guard band.

INCONCLUSIVE - The measured result is inside the guard band and below the specification limit and the measured result is above the specification limit but below the specification limit added to the guard band.

FAIL - The measured result is above a specification limit added to the guard band.

DATA – There is no specification limit required which is not possible to state the conformity.

Rule 2:

For any requirement state to be "Minimum"

PASS - The measured result is above a specification limit plus guard band.

INCONCLUSIVE- The measured result is inside the guard band and above the specification limit and the measured result is below the specification limit but above the specification limit added to the guard band.

FAIL - The measured result is below a specification limit minus guard band.

DATA – There is no specification limit required which is not possible to state the conformity.

Rule 3:

For any requirement state to be "a range (Between Upper to Lower specification limit)"

PASS - The measured result is within a range of upper and lower acceptance limit.

INCONCLUSIVE- The measured result is inside the guard band at either side of specification limits

FAIL - The measured result is outside a specification limit minus/added to the guard band.

DATA – There is no specification limit required which is not possible to state the conformity.

Rule 4:

For any test based on subjective grading of results by using 9-point scale

PASS - The measured result is above specification limit.

FAIL - The measured result is below a specification limit.

DATA – There is no specification limit required which is not possible to state the conformity.

This test report is governed by the Terms and Conditions, available on request or accessible at <https://www.mts-global.com/en/terms.html>. Attention is especially drawn to the limitations of liability, indemnification and jurisdictional provisions defined therein. This report is issued strictly based on the testing of the samples, products, materials submitted by you to the laboratory, as described in the "Sample Description" section and tested in the conditions shown in the present report. The test results in this report refer only to the sample(s) actually tested and do not refer or be deemed to refer to any bulk production from which such sample(s) may be said to have been obtained. In the event that MTS was requested to survey and test any bulk production quantity of samples, MTS, in the absence of any contrary written instructions, performed random sampling of bulk production for testing purposes. Variations in the conditions under which samples are stored, transported, etc., may lead to variations in the test results. MTS cannot anticipate and shall not be held responsible for variations in test results that may be due to factors beyond MTS' control, such as, sample cross-contamination, evaporation of volatile substances due to storage temperature, humidity, etc. This report does not constitute a recommendation, actual or implied, for any specific course of action. Other than the expressed warranties made in the Terms and Conditions of the MTS Test Request Form, MTS makes no warranties or representations either express or implied with respect to this report. In no circumstances whatsoever shall MTS be liable for any consequential, special or incidental damages arising out of, or in connection with, this report. This document shall not be reproduced unless prior written authorization from MTS has been attained. Printed copies of this document shall be considered as a copy.
