

CASE·MATE 

CHARGING FOLIO

for iPhone 6

USER GUIDE

GETTING STARTED

Welcome

Congratulations on your recent purchase of a Case-Mate charging folio! The charging folio gives your iPhone 6 up to 125% extra battery life* with the added protection of a removable hard case. Its rapid-charging 3,500mAh battery is also smart enough to drain power from the folio before your iPhone, so when you're done charging you'll always have a fully charged iPhone ready to go.

*The amount of additional battery life varies depending on actual usage factors that are different for every user.

What's Included

- Charging folio
- Micro USB charging cable
- Removable slim case
- Quick start guide

Compatibility

The charging folio was designed solely for use with the iPhone 6. Please do not attempt to use this product with other devices.

First Use

The battery in the charging folio is fully charged out of the box and ready for the first use.

Installation

Slide the removable slim case out of the battery dock and snap your phone into the case. Using the grooves on the slim case as a guide, slide the case back into the battery dock. The battery dock and case should be aligned and the lightning connector should be fully inserted into the iPhone.

NOTE: You will need to remove the case or slide the case upward from the battery dock to use the iPhone camera and to insert headphones. When using headphones, slide the case upward and pull the headphone connector through the hole at the bottom of the battery dock. Plug the headphones into the iPhone and push the case securely back down into the battery dock.

Actual folio style may vary

CHARGING

Charging Your iPhone

When your iPhone battery is low, turn on charging mode with the power switch located at the base of the battery dock. Make sure your iPhone is secured in the slim case and the case is situated properly in the battery dock with the lightning connector securely inserted into the bottom of the iPhone. It is recommended to turn on charging mode when your iPhone battery becomes low (20% or less). The iPhone requires more power when it is constantly being charged, so you will see better results from the folio battery if you wait to charge when your iPhone battery is low. If your iPhone is fully charged when charging mode is turned on, then the battery dock will act as your primary iPhone battery until it has been depleted.

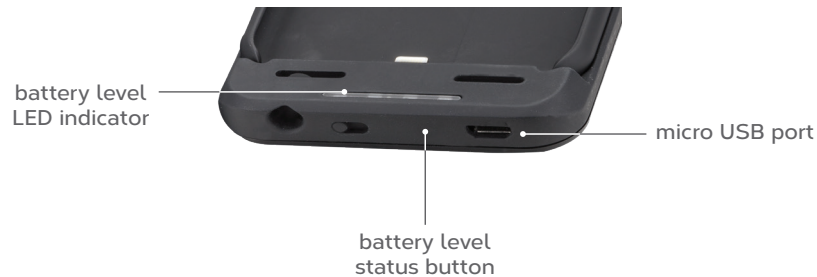

Actual folio style may vary

power switch

Recharging the Folio

Connect the included micro USB cable to the micro USB port on the bottom of the battery dock. Connect the other end of the cable to a computer USB port or USB wall adapter. The LED bar on the front of the battery dock will begin flashing to indicate that charging has begun. If you would like to check the charging status, tap the battery level status button on the bottom of the battery dock and the LED will illuminate to the appropriate level to indicate the battery level.

NOTE: You do not need to remove your iPhone from the folio when the folio is recharging. If you leave your iPhone in the folio, it will recharge the iPhone first and then begin to charge the folio.

Checking the Battery Status

To check the battery status of the folio, tap the battery level status button on the bottom of the battery dock and the LED bar will illuminate for several seconds to indicate the current battery level. When connected to a power source, the LED bar will illuminate to indicate charging and will automatically turn off after approximately 30 seconds.

Battery Level Indicator LED	
1/4 Line:	1 - 25%
1/2 Line:	25 - 50%
3/4 Line:	50 - 75%
Full Line:	75 - 100%
Complete recharge time is approximately 4 hours	

CARING FOR YOUR FOLIO

- Keep your folio dry and away from moisture and liquids.
- The folio is crafted from genuine leather and daily use will result in a natural patina from the oils in your hands. Our genuine leather products have not been coated or glazed in order to preserve the beauty of the natural leather. To clean dirt, we recommend gently wiping the leather with a damp cloth. Leather cleaner may result in a change in color or finish and is not covered by the warranty. In addition, the dye in other materials, such as dark jeans, can rub off on the natural leather of your folio, so please keep this in mind as it also is not covered by the warranty.
- To clean the removable slim case, simply wipe it with a soft, water-dampened cloth. Gently wipe the pins on the Lightning connector with a soft, dry cloth.
- Recharge the folio once every three months when not in use.

CUSTOMER SERVICE & WARRANTY

The Case-Mate charging folio includes a 1-year warranty from date of purchase. For detailed warranty information, please visit www.case-mate.com/warranty or contact Case-Mate customer service at:

REGULATORY AND SAFETY NOTICES

USA: Federal Communications Commission (FCC) Statement

Name: Case-Mate Charging Wallet, Case-Mate Charging Wristlet and/or Rebecca Minkoff Charging Wristlet
Model: CM032707, CM033498, CM033554, CM033556, CM032871
FCC ID: C1850328 02

This device complies with Part 15 of the FCC rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

FCC Warning: Changes or modifications to this device not expressly approved by Case-Mate, Inc. could void the user's authority to operate the equipment.

Canada: Industry Canada (IC) Statement

Name: Case-Mate Charging Wallet, Case-Mate Charging Wristlet and/or Rebecca Minkoff Charging Wristlet
Model: CM032707, CM033498, CM033554, CM033556, CM032871
IC: C1850328 03

This device complies with Industry Canada license-exempt RSS standard(s).

Operation is subject to the following two conditions:

1. This device may not cause interference, and
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes:

1. l'appareil ne doit pas produire de brouillage, et
2. l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.

Important Safety Instructions

- Do not store the charging folio in high temperature environments, such as intense sunlight. Do not place the Mobile Charger in fire or other excessively hot environments.
- Do not expose the charging folio to moisture or submerge it in liquid. Keep it dry at all times.
- Be cautious of excessive drops, bumps, abrasions or other impacts to the charging folio. If there is any damage to the battery such as dents, punctures, tears, deformities or corrosion due to any cause, discontinue use and contact the manufacturer or dispose of it in an appropriate manner at your local battery recycling center.
- Do not disassemble the charging folio or attempt to repair or modify it in any manner.
- Do not attempt to charge the charging folio using any method, apparatus or connection other than the device's USB connector.
- Do not attempt to replace any part of the charging folio.
- Do not slide or push on the power button with excessive force to avoid damaging the switch.
- It is normal for the product to become warm during use.
- If the charging folio is intended by Purchaser to be used by a minor, purchasing adult agrees to provide detailed instructions and warnings to any minor prior to use. Failure to do so is the sole responsibility of the purchaser, who agrees to indemnify the Manufacturer for any unintended use/misuse by a minor.
- All Case-Mate charging folio products have gone through a thorough quality assurance inspection. If you find that the charging folio is excessively hot, is emitting an abnormal smell, is deformed, abraded, cut or is experiencing or demonstrating an abnormal phenomenon, immediately stop usage and contact the Manufacturer.
- For extended storage, first charge the folio for one hour.
- Never dispose of the charging folio in the garbage. Disposal of batteries in the garbage is unlawful under state and federal environment laws and regulations. Always take used batteries to your local battery-recycling center.

LEGAL

Please consult your device packaging to determine whether this device is compatible with your particular mobile device. Manufacturer is not responsible for any damages to any mobile device incurred through the use of this product.

Manufacturer shall not in any way be liable to you or to any third party for any damages you or any third party may suffer as a result of use, intended or unintended, or misuse of this battery in conjunction with any device or accessory other than the appropriate mobile device for which this battery is designed. If you are responsible for battery use with an unintended mobile device and damages result from such use, you agree to indemnify the Manufacturer for any resulting injuries to any third parties.
