

ViewSmart 1600+ Controller Embedded Webpage

All ViewSmart 1600+ controllers come standard with an embedded webpage. The webpage gives remote access to view, configure, and save the controller's settings and data log. Use any web enabled device to have easy access to your controller's settings and readings anywhere; anytime. Our webpage feature allows for convenient off site monitoring and configuration at your fingertips. Use on a desktop computer, laptop, or even a tablet.

FEATURES

- New security settings allow for even more secure access to data viewing and settings changes while accessing the webpage from your web enabled device
- Backup and restore of system configurations
- Remote configuration ability
- Convenient off site e-mail notification included with daily, weekly summary
- Separate zones by location or gas type
- Allows for channel configurations of 8 or 16 channels
- Brightly colored cells indicate alarm status of all channels simultaneously
- Locking of critical configuration variables now available through the all new Authorization Mode

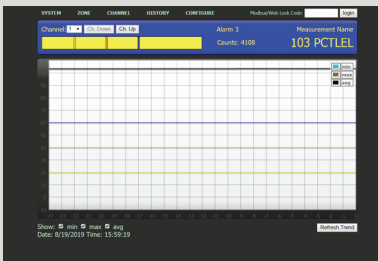

System Screen

Displays all active channels on the same screen with real time data

Zone Screen
