Add Settings Capture and Restore to <u>Your</u> Solution

User Settings API is an SDK to enable the deployment of services that capture and preserve your customer's investment in user customization and perfect restores.   It captures everything that makes "the computer 'yours.'"

Build New Applications or Enhance Existing Services

User Persona API resides alongside existing architectures and enables robust, management of Computer Personas. It delivers full settings capture for a number of applications. User Persona:

- Captures only the settings that matter (up to 10,000 or more)
- Captures settings and files for all users on a device without logging in separately
- Restores FORWARD to any version of Windows, Office, Adobe, Browsers, and more. Most solutions only restore to the same version of an app.
- Captures and transfers according to customized rules.
- Enjoys Tranxition's enviable 99.9% sigma rating for reliability*.
- includes client-side AES-256 encryption and FIPS 140 compliance.
- Supports cloud storage and retrival (HTTPS, Oath2).
- Includes multiple examples in fully-functional sample applications.
- The simplest use case only takes a few lines of code to implement.
- Supports C, C++, and Java.

User Persona API will deliver the best-in-class "persona" capture and restore functionality available anywhere.

Making User Transfers and Recoveries Easy

Systems are replaced for a variety of reasons: hardware failures, upgrading, replacing devices, or relocation, termination, lost gear, the list is long.

User Persona API enables applications to capture and restore end user's unique personalities keeping all customizations intact including data files/structure, layouts, web favorites, application settings, drive mappings, wallpaper, email signatures and more – all while migrating from legacy Windows® OS to the latest and greatest. We capture and restore more than 10,000 settings.

Your users may save $300 per device or more and nearly as importantly, your customers will gain higher end-user satisfaction rates and perhaps more business as well.

User Persona Features

Applications: Microsoft Office 2003,2007,2010 and 2013. Adobe Reader and Photoshop, Google Chrome, Firefox, and many more.

Operating Systems: Windows XP, Windows Vista, Windows 7 and Windows 8/8.1.

Proven Reliability: Tranxition's customers have rated our solution at 2σ reliability (99.99%)

Security Ensured: Client-side encryption using multiple methods.

Storage: Use almost any storage method including servers, thumb-drives, servers, SAN/NAS Drop-Box, Google Drive, or other cloud platforms.

Languages: UP-API can be rapidly prototyped and implemented in C, C++, and Java.

Support: Tranxition's support team responds rapidly to support requests.

Implementation: Prototypes can be implemented in a mattter of hours.

Proven Enterprise-Class Persona Management

DEPLOY FOR HUNDREDS OR THOUSANDS OF PCs AT ONCE

Unique features enables zero-touch migration for the enterprise.

GO VIRTUAL WITH EASE

User Persona API enables capture and restore from and to: Virtual Machines, Terminal Services, Remote Desktop, and Desktop-as-a-Service scenarios. It's also being used today in Asset Management and Systems Management solutions!

DEEP SUPPORT FOR MICROSOFT OFFICE

User Persona API takes care of thousands of settings in Microsoft Office, including cross-version from Office 2003, 2007, 2010, and 2013. User Persona API handles it all, including Outlook (settings and PST hookups), Word (nearly 600 settings), Excel (All major customizations) and much, much more!

SUPPORTS MOST LANGUAGES
User Persona API languages include C, C#, C++, F#, Java and Javascript.

Finally, Thorough Settings Capture is Here!

IMPLEMENT ADVANCED BACKUP SOLUTIONS Most backup solutions, if they support user settings at all, base their solution on free technology from Microsoft. This technology has been discredited as it fails 29% in the field.

DELIVER SOLUTIONS THAT ACTUALLY CAN RESTORE The news over the last 40 years tells story after story about how the "backup did not work." Tranxition's technology delivers millions of restores.

MAXIMIZE USER SATISFACTION User customizations are preserved, maximizing productivity, and getting people back on track quicker. Listen to users say: Wow, I got all my stuff back!

CROSS DOMAIN MIGRATION Cross-domain and encrypt over the wire migrations for sensitive environments.

CREATE PROFILES ON INJECTION The solution even allows you to create Windows Profiles on Injection.
