

Christmas Stocking Groovi Plate

Add the toys into the Christmas stocking when you are embossing the design. Do this by lining up the straight line at the base of the group of toys with the line on the top of the stocking. You can still use the shaped stocking card as a base, it just means that the toys will protrude over the top of the folded card.

One Layer Stocking

You can make a single layer card using the pre-cut stocking shaped card as a base. Then emboss the stocking as it appears on the plate. Choose ordinary parchment paper or one of the many beautiful coloured Groovi parchment papers available. Stick your stocking onto the folded card base using tiny dabs of Perga glue hidden behind the white embossed areas. Alternatively you can stick the new Perga Crystals on top to hide your dabs of glue. The Perga Crystals are a great alternative to brads.

Two or three layered card

If you want a more spectacular stocking you can split the stocking into layers. Use the whole design as a base and then do another stocking top and also a toe and a heel if you so wish. You can picot cut out around the layers or you can use ordinary scissors. Give your stocking as many layers as you wish and choose different embellishments for a different look. If you don't want to emboss all the dots on the Groovi plate then there are complete line shapes for decorating the stocking.

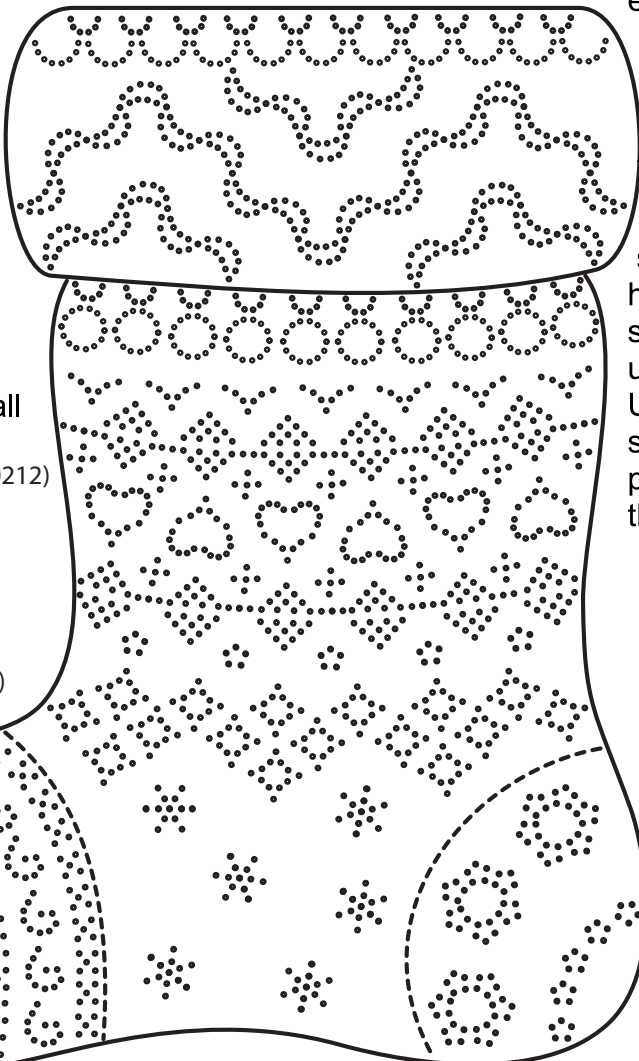

Needle tool pattern

Picot V small stars

Needle Tools

- Picot V small (10285)
- 5-needle (10212)
- Swirl (10235)
- Drop (10228)
- Moon (10232)

Needle Tool Christmas Stocking

Using the Groovi plate and number 1 Groovi tool, emboss the stocking outline, stocking top and broken lines of toe and heel only. Remove from the plate and secure right side up onto this pattern, lining up the outlines of the stocking. Using the needle tools indicated, perforate shallow through the parchment and the pattern. Emboss the shapes within and then perforate deep using a 1-needle tool.

Needle Tools

- 5 in a circle (10223)
- Flower (10211) and 2-needle tools
- 2-needle (10261)
- Semi-square (10214)
- Semi-circle mini and Star Point
- Semi-circle mini (10237)
- Star Point (10236)
- Semi-circle (10209)
