Notice

Hand Dryer

This unit includes the following standard accessories :

Power Supply Cover Kit

Wall Mount Kit

Filter Equipped

Cleaning Kit

HOW TO USE

- Insert your hands and the unit will start automatically.
- Slowly move your hands up and down through the air until your hands are dry.
- The unit automatically stops once the hands are removed and is ready for the next cycle.

Power Switch on / off
(factory default setting "ON")
Speed Control High/Low
(factory default setting "High")

LED DISPLAY

Standby: Standby: the indicator light is OFF.

LED1: Starting operation: (Mode 1) LED 1 appears a blue icon "O" 3 times. Thereafter the LED lights rotate clockwise for 9 seconds, (one drying cycle) thereafter the 30 LED lights blink for 3 times. The LEDs rotate again and flash after 9 seconds. Thereafter the machine shuts off automatically. (Mode 2) Same as above but LED start to rotate clockwise for 10 seconds right away. If there is an electrical or motor problem occurs all 30 LED lights will blink for 30.

LED2: Filter change sign. The Filter sign will turn on after 25000 uses. After replacing the filter the filter sign will stay for 5 seconds, and then blink 3 times (the filter usage is reset).

LED3: Shows that the water tank is full. When full the water tank will blink red until the water is emptied and the tray is put back into the unit.

MAINTENANCE

- All surfaces of the unit should be cleaned daily with a soft cloth and a non-caustic cleaning solution
- The unit should only be in operation with filter and water.
- Regularly check filter condition and water tank status on the display panel.

Red blinking light

- Do not wash the filter with water. Clean the filter from dust and dirt once a week. The filter should be replaced after 25000 uses.
- When the unit reaches 25000 operations/cycles the red LED on the display panel will start blinking until the filter is cleaned or replaced with a new one.
- To purchase filters please contact your local supplier.
- WARNING: If the filter is not replaced on time or the airflow is blocked from heavy dust and dirt the motor can overheat and be damaged. In this case the warranty terms and conditions are not valid.

- When the water tank is full the water full sign is activated on the display panel.
- If the water tank is not emptied on time the water will overflow and create dirty and wet conditions in the washroom.
- Empty and clean the water tank before the Water Full lights on.
- If the water tank is not emptied and cleaned on a regular basis it can lead to bad smells due to the collection of bacteria.
