

ATP38 in Esthetics Médecine & Dermatology BIBLIOGRAPHY

HEALING

A Mechanism Behind LED Phototherapy For Wound Healing And Skin Rejuvenation: Key Role Of The Mastocyte
Calderhead RG, Kubota J, Trelles MA and Ohshiro T.

[Laser Therapy. 2008 ; 17.3 : 141-148](#)

Low-level Laser Therapy And Phototherapy-assisted Hydrogel Dressing In Burn Healing: Biomodulation Of Light-guided Epithelial Stem Cells

Kim JW and Lee JO.

[Dans : Innovations en Chirurgie Plastique et Esthétique. Springer ; 2008. p. 36-41](#)

Light emitting diode (LED) therapy combined with visible light and infrared improves wound healing after laser ablative resurfacing of photo-damaged facial skin

Trelles MA, Allones I and Mayo E.

[Application au laser médical. 2006 ; 21 : 165-175](#)

Red Light-emitting Diode (LED) Therapy Accelerates Wound Healing After Blepharoplasty And Ablative Resurfacing With Pericardial Laser

Trelles MA and Allones I.

[Journal of Cosmetic and Laser Therapy. 2006 ; 8 : 39-42](#)

Red Light Emitting Diode (LED) Assisted Healing Improves The Results Of Laser Ablation Er:Yag Of Plantar Warts
Trelles MA and Calderhead RG.

[Thérapie au laser. 2005 ; 14.4 : 179-183](#)

Synergistic effect of ablative Erbium Yag laser skin resurfacing combined with a Quasilaser Light 415nm, 633nm, 830nm LED matrix in Asian patients

Kim JW, Lee JO, Calderhead RG, Rhee CG et Ahn WS.

Journal of the Korean Society of Laser Medicine and Surgery. 2005; 9: 15-23

SKIN REJUVENATION

The Use Of Light-emitting Diode Therapy In The Treatment Of Photoaging Skin
Baez F and Reilly LR.

[Journal de dermatologie cosmétique. 2007 ; 6 : 189-194](#)

A prospective, randomized, placebo-controlled, double-blind, divided face clinical study on LED phototherapy for skin rejuvenation: clinical, profilometric, histological, ultrastructural and biochemical assessments and comparison of three different treatment parameters
Lee SY, and al.

[Journal de photochimie et photobiologie B.2007 ; 88 : 51-67](#)

A study to determine the effectiveness of combined LED light therapy (830 nm and 633 nm) in facial skin rejuvenation

Russell BA, Kellett N and Reilly LR.

[Journal de thérapie cosmétique et laser. 2005 ; 7 : 196-200](#)

ACNE

Randomized trial of three phototherapy methods for the treatment of acne vulgaris in Chinese patients
Li-Hong Liu, Xin Fan, Yu-Xi An, and al.

[Photodermatol Photoimmunol Photomed 2014; 30 : 246–253](#)

A Study To Determine The Effect Of The Combination Of Blue (415 Nm) And Near Infrared Therapy (830 Nm) Light Emitting Diode (LED) For Moderate Acne Vulgaris
Sadick NS.

[Journal de la thérapie au laser cosmétique. 2009;11\(2\):125–128](#)

Portable LED Network Device In The Treatment Of Acne Vulgaire
Sadick NS.

[Journal des médicaments dans Dermatol. 2008;7\(4\):347–350.](#)

LED phototherapy with a combination of blue and red light for common acne in patients with skin phototype IV
Lee SY, You CE and Park MY.

[Lasers en chirurgie et en médecine. 2007 ; 39 : 180-188](#)

Light-emitting diode 415 nm in the treatment of inflammatory acne
Tremblay JF, Sire DJ, Lowe NJ and Moy RL.

[Journal de thérapie cosmétique et laser. 2006 ; 8: 31-33](#)

Combination of blue (415 nm) and red (633 nm) LED phototherapy in the treatment of mild to severe common acne

Goldberg DJ and Russell BA.

[Journal de thérapie cosmétique et laser. 2006 ; 8 : 71-75](#)

An open study to determine the effectiveness of blue light in the treatment of mild to moderate acne
Morton CA, Scholefield RD, Whitehurst C and Birch J.

[Journal of Dermatological Treatment. 2005 ; 16 : 219-223](#)
