

## TAPE HEAD CLEANING

It is extremely important to regularly clean tape heads, capstan and pinch roller of tape recorder equipment. Regular cleaning will increase the life of the equipment, protect tapes and enhance the sound quality of recordings and playbacks. S-721H PROFESSIONAL TAPE HEAD CLEANING FLUID will remove residual tape oxides, tape adhesives, dirt and other harmful contaminants that can build up on the tape head and clog the tape head's critical gap area.

C-911B AUDIO CASSETTE CLEANER

CS-1 COTTON SWABS

CS-1 CHAMOIS SWABS

WP-1 NON-LINT WIPES

### MANUAL CLEANING WITH SWABS

Apply S-721H Cleaning Fluid to a cottons swab (CS-1) and gently clean the tape head, tape guides, capstan and pinch roller of recording equipment. Do not scrub! S-721H will do the work. For sever tape oxide build-up, a second application may be necessary. For video heads, only use VS-1 CHAMOIS SWABS when cleaning. Always follow safety instructions on the bottle. **KEEP OUT OF REACH OF CHILDREN.**

## CASSETTE

## REEL TO REEL

## VHS VIDEO RECORDER & ADAT

**ONLY USE VS-1 CHAMOIS SWAB TO CLEAN VIDEO HEADS**

**WIPE IN A SIDE TO SIDE MOTION ONLY.**

**NEVER UP & DOWN!**

## CASSETTE CLEANER

(A) Wind blue ribbon onto one reel; (B) Place the dropper stem in fluid, squeeze and draw out to fill 1/4 of bulb; (C) Apply cleaning fluid to blue band through holes; (D) Apply fluid to felt cleaning pads; (E) Place cassette cleaning cartridge into player and engage the play mode for 10 seconds. Eject after completion. Tightly replace cap on bottle of cleaning fluid when not in use.

### PINCH ROLLER/CAPSTAN PAD REPLACEMENT

(C-912 Replacement Pad Kit - set of 3 pair)

## DEMAGNETIZER

Residual magnetism can build up on the tape head, causing increase signal noise and loss of fidelity. The D-512 PROFESSIONAL WAND DEMAGNETIZER generates a strong oscillating magnetic field eliminating accumulated residual magnetism, restoring optimum tape machine performance. In addition, it is also recommended to demagnetize all metal parts along the tape path including capstan and guides.

Use only as intended. Should be used by qualified individual. CAUTION: Risk of electrical shock! Do not use near water or if wet. Intended for indoor use only. Use in dry, ventilated area free of excessive dust, humidity, flammable materials, corrosive fumes and conductive contaminants. For 110-120 volt, 50-60Hz AC use only. Do not plug into any other power source. Do not operate with missing or damaged plug or electrical cord. **KEEP OUT OF REACH OF CHILDREN.**

### INSTRUCTIONS

(a) Plug the cord into the proper 110vAC power outlet; (b) Place the demagnetizer tip just next to the tape head (make sure the red protective cover is in place);

(c) Slowly rotate the demagnetizer tip in a circular motion while slowly pulling away until a distance of 12". Once complete, unplug demagnetizer from the power source.

## VINYL DISC CLEANERS

**WET STYLE LP CLEANER** with felt brush cleans out particles from record grooves and is anti-static. Includes stylus brush - MODEL: VDC-120

**CLASSIC DUAL CARBON FIBER BRUSH** cleaner has 1,000s of fine bristles to remove dust and contaminants from record grooves. Anti-static as well - MODEL: VDC-101

## TURNTABLE MATS

**ANTI-STATIC MAT** is made from a mix of felt and fine carbon fibers. Helps to reduce crackling and static noise. MODEL: VDC-125

**CORK MAT** is 3mm thick with carbon fibers imbedded for an anti-static surface which reduces noise and dampens vibrations better than standard rubber mats. Improves overall sound quality. MODEL: VDC-130

## STYLUS BRUSH

High density, super-fine carbon fiber bristles design to remove sticky, hard materials and fine dust particles from stylus. Conductive carbon fibers eliminate static charges. MODEL: VDC-129

## VINYL LP CLAMPS

**CLAMP STABILIZER** is made from weighted aluminum providing better LP to platter contact reducing vibration and shaking. Black anodized finish. Weighs 16 ounces. MODEL: VDC-131

**2 in 1 CLAMP STABILIZER & BUBBLE LEVEL** is made from weighted aluminum providing better LP to platter contact reducing vibration and shaking. Use level to verify turntable set-up. Clear finish. Weighs 12 ounces. MODEL: VDC-131

## ACCESSORIES

### ALUMINUM 45 ADAPTER

**45 RECORD ADAPTER** for playing 45 RPM records on full size turntables. Precision machined aluminum. MODEL: VDC-133

### DIGITAL STYLUS FORCE GAUGE

For more precise measurement of stylus vertical tracking force. Requires 2 "AAA" batteries. MODEL: VDC-134

## DISC & SCREEN CLEANING

**OPTIKAL KLEENER** uses all natural enzymes for cleaning all types of optics and screens including CDs, DVDs, Phones, Tablets, TVs, Cameras and lenses. Non-flammable, non-toxic and does not streak or leave a residue. Includes optical grade micro fiber cleaning cloth that can be used wet or dry. Large 4 oz spray bottle with 11" x 14" cloth and travel size with 1 oz spray bottle with 6.5" x 6.5" cloth.

## CO2 & NITROGEN DUSTERS

Carbon Dioxide (Co2) and Nitrogen gas offer superior performance and safety over chemical aerosol dusters. These gases are natural, non-flammable, non-toxic and will not leave a residue or

release harmful vapors. Ideal for use on lens, screens, CD/DVDs, camera, electronics, computer, printers, sewing machines, electric razors, air vents, keyboards, models, tools and other devices. Empty steel cylinders are 100% recyclable, making it better for the environment.

**CORK MAT** is 3mm thick with carbon fibers imbedded for an anti-static surface which reduces noise and dampens vibrations better than standard rubber mats. Improves overall sound quality. MODEL: VDC-130

## SLEEVES

62 Micron **RECORD JACKET PROTECTION SLEEVES** - Set of 25 MODEL: VDC-122-025

50 Micron **RICE PAPER LP SLEEVES** Set of 25 - MODEL: VDC-128-25

## HEADSHELLS

Standard 4 pin **ALUMINUM HEAD SHELL** with gold leads.

BLACK: VDC-123

SILVER: VDC-124

**HEAD SHELL CABLES** with gold leads. Set of 4. MODEL: VDC-127

**HEAD SHELL SCREW SET** Set of 3 sizes. MODEL: VDC-127

## TABLET & PHONE MOUNTS

**SMART BRACKET** consist of precision machined aluminum tablet and phone mounts with additional brackets and supports for use in photography, film, broadcast, music, education and business. Mounts will not bend, crack, twist or break apart. Exclusive screw down fastener safely secures device in mount while large rubber bumpers protects device's delicate edge. Mounts use the common 1/4"-20 threading compatible with virtually all types of existing tripods, stands and supports. Ideal for use by both professionals and enthusiast!

**HAND-HELD PHONE PHOTO/FILMING KIT**

**TABLET PHOTO TRIPOD KIT**

**HAND-HELD TABLET PHOTO FILMING KIT**

**PHONE MOUNT**

**POLE MOUNT KIT FOR USE WITH MICROPHONE, LIGHT & CYMBAL STANDS**

**TABLET MOUNT**
