

The LinearQ™

The world's most advanced pool cue.

Simply take hold of the sleeve and slide the cue through for accuracy and control like never before. Say goodbye to messy hand powders and missed shots!

REMOVABLE TIPS
Allow quick and easy change-over to any diameter tip that you may prefer. Its twist-off tip design makes it easy to replace tips or change tip sizes effortlessly.*

Unique Patented Design

The LinearQ™

The LinearQ™ is meticulously quality controlled throughout every aspect of its manufacture. From its precision-ground stainless-steel shaft to its bearing sleeve assembly to its machined handle, tolerances are controlled to just a few thousandths of an inch. The result: a top-quality cue unlike any other on the market. A one-year product warranty covers parts, labor, and shipping costs if any defect is found.

SHAFT AND BEARING SLEEVE
Shaft utilizes the highest quality, non-oxidizing stainless steel. Internally reinforced hollow tubing naturally strengthens its structural integrity to counter-act bowing. Friction free bearing sleeve can be easily removed for maintenance or custom grip replacement.

HANDLES
Manufactured from aircraft grade aluminum. Length and taper controlled to thousandths of an inch. Weight controlled to tenths of an ounce. Sleek anodized finish.

JOINT ASSEMBLY
The handle to shaft joint incorporates a stainless steel stud and brass insert. Two-piece cue joins to create a 57 inch length.

WEIGHT CONTROL
Standard 20 ounce stick with changeable bumper weights allow you to increase stick weight up to 23 ounces. Overall combined weight is controlled to 1/10th of an ounce.**

*One 12.5mm Weathered Elk Master tip included
**Additional weights not included
