# USING AMAZON ECHO QUICK GUIDE

## Preparation

- Amazon Alexa APP
- Amazon Alexa account (users need to register their own account)
- Smart Life APP
- Smart Life APP account (users need to register their own account, select region as "The United States".)
- Echo, Echo Dot, Tap and other Amazon voice-operated devices
- Our smart device (For example, smart plug)

Rename the device after configuring successfully, and then name of the device is recommended to use English words which easy to pronunciation.

## Set your Echo speaker by Alexa APP

- Sign in with Alexa account & password (If not have, sign up first). After login, click the menu at the top left, then click the "Settings", and choose "Set up a new device".
- Choose a device (for example, Echo). When the right page appears, long press the small dot on your Echo device until the lights turn to be yellow. Then click "Continue" on APP. (Note: at this time the mobile phone can not open VPN software.)

- Choose user's WiFi and wait for a few minutes.
- After an introduction video, click next step. It will go to "Home" page automatically. Now the echo connected to Alexa APP through WiFi successfully.

## Enable our skill in Alexa APP

- Choose "Skills" in the options bar, and then search "Smart Life" in the input box; Select "Smart Life" in the search results, and then click "Enabled Skill". (Note: There will be the interface on the right, which indicates that the account has been bound. If there is more than one test, you can click the "Disable Skill" to remove the binding, and then click the "Enable Skill" to continue to bind a new "Smart Life account".)

- Input the user name and password that you had previously registered (Only support the account in the United States). When you see the right page, it means that the Alexa account linked with Smart Life account.

## Control Device via Alexa APP

After the previous operation is successful, you can control socket via Echo. Discover device: Firstly, users need to say to Echo: Echo (or Alexa), discover my device," Echo will start to find the device which added in Smart Life APP, it will take about 20 seconds to show the result. Or click "Discover devices" in Alexa APP, it will show the devices that found successfully.

Note: "Echo" is one of the wake-up names, which can be any of these three names (Settings): Alexa/ Echo/Amazon.

- Support Skill List  
Users can control devices by instructions like below:  
Alexa, turn on [bedroom socket]  
Alexa, turn off [bedroom socket]  
Note: The name of the device must be consistent with the addition of Smart Life APP.
