

SNAKESKIN Media Box Holders are the ideal way to place standalone steaming boxes, electronics and other devices behind flatscreen TVs. Media Box is made from thick and lightweight, clear PVC material, that is IR compatible, so sensors can be mounted on the outside of the box if desired. Excellent bond to rear of TV with special heat-resistant adhesive pads. Small size box is designed to hold small streaming devices while large box will accommodate small cable and satellite receivers and other electronics. Maximum weight capacity - 1.5 lbs.

INSTRUCTIONS

- a) Carefully unfold box to rectangle shape. As bottom unfolds, position locking tabs lock into place.

- b) select a smooth and flat area on rear of TV to place media box holder and use provided wipe to clean off surface. Allow several minutes for area to dry. Peel off protective cover from large adhesive pads and affix box to TV with the box opening facing up. Insert hand into media box and press firmly to back TV so adhesive pads make full contact. Place streaming device such as Apple TV or Roku in box with cables exiting the top.

- c) Use REGRIP CABLE STRAP & MOUNT (not supplied) to support cables exiting media box.
