Climate change adaptation/mitigation</li> </ol>
The planned start & end date of the programme	January 2019 – December 2019
The financial period of the implementing Partner	1 <sup>st</sup> April to 31 <sup>st</sup> March
The location of the programme area (district / city / town / region).	Jhadol taluk , Udaipur District, Rajasthan
The overall budget of the programme	Indian Rupee: 3,789,423.00 (A\$ 75,788.00)
Direct Beneficiary in the program	12,500 (for the year 2019)
Address and contact person at National office	<p>Name: Mr.Newbegin Packianathan Role:CEO Address:Kothanur, Bangalore-560077</p> <p>Phone:*9449455520</p>
Address and contact person at Field office	<p>Name: Mr.Joseph Ignar Parmar Role: Program Director Address:Baroda, Gujarat</p> <p>Phone:* 7567368528</p>
Activity Year	2019-2022(4 years)
The data that the proposal was written (or date of latest revision)	23 <sup>rd</sup> October 2018

## Section B Programme Context

Rajasthan 'Land of Kings' or 'Land of Kingdom' is India's largest state by area. The state located on northwest part of country and is a home of cultural diversity. Its features include the ruins of Indus Valley Civilization, Temples, Forts and Fortresses in almost every city.

Rajasthan's formerly independent kingdoms developed a rich architectural and cultural heritage; same can be seen today in numerous forts and palaces, which are enriched by feature of Muslim and Jain Architecture.

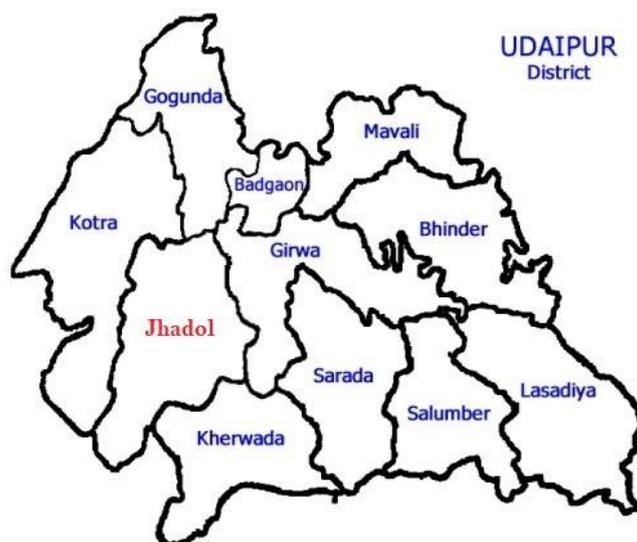

The State was formed on 30th March 1949 when Rajputana – name as adopted by British Crown was merged into the Dominion of India. Jaipur being largest city was declared as capital of the state.

### A Brief on the Taluk of Jhadol (Proposed Field)

The Jhadol taluk of Udaipur is dominated by tribal population and is 50 kms. from the district headquarter. Jhadol has a hilly and rocky terrain. It is the headquarters of Jhadol taluk sub-district, and is sometimes written as Jhadol (Phalasia) to distinguish it from two other villages of the same name in Udaipur district.

Jhadol taluk is an administrative sub-division of Udaipur district in Rajasthan. The literacy rate of Jhadol Taluk is 42.24% out of which 53.4% males are literate and 30.81% females are literate. The total area of Jhadol is 1,429.58 sq.km with a population density of 174 per sq.km.

There are 2.57% Scheduled Caste (SC) and 75.78% Scheduled Tribe (ST) of total population in Jhadol Block.

There are 277 villages in Jhadol block in 31 Gram Panchayat. After a detailed survey 22 villages in 7 Gram Panchayat are selected for the implementation of KING project.

## **Section C**

### **Problem Identification and Selection**

Problem identification and selection has been done by the CRFI staff through methods like community Participatory Rural Appraisal (PRA) and Focused Group Discussion (FGD) in 22 villages of Jhadol block. Men, women, youth, farmers and children were also part of the discussions.

Among the outcome of many needs, the community prioritised the following needs:

1. Health with special attention for women and children
2. Agriculture development
3. Economic Development
4. Education
5. Training

## **Section D: Program Approach and Justification:**

### **1. The target groups or beneficiaries:**

This Project will directly help, men, women, children, students, sick people, marginal farmers and address issues of the poorest in the selected community.

### **2. Issues in the community:**

1. Backward in Literacy.
2. Low Agricultural Productivity.
3. Government services and service providers are situated far from them and there is no one to advocate for them.
4. Women and children suffer from malnutrition and health problems as there is food scarcity and less nutritious food intake.
5. Women are most underprivileged with low income and are prone to sexual abuse.

### **3. Purpose and Goals:**

1. To help women to start small scale business by micro financing and giving micro entrepreneurship training.
2. To provide vocational training in tailoring, beauty parlour, masonry work and cycle repairing.
3. To create awareness for women rights & sexual harassment by conducting seminars and trainings.
4. To support gender equality and basic education by providing cycles for the school going girls.
5. To provide free health care by setting up Community Health centre with mobile outreach plans, assistance for major illness by referring them to a nearby hospital and supply of nutritional supplementary for pregnant women.
6. To provide new bore well by tapping the government sources and schemes.

7. To help farmers to augment their income by providing training & exposure to new techniques in agriculture and providing seeds/saplings.
8. To mitigate climate changes by conducting seminars to create awareness in the target villages.

## **Activity Development outcomes and Effectiveness**

### **I. Number of people benefitting from this project:**

A total of approximately 12,500 people will benefit from our activity including women, men and children.

### **II. The result we expect to accomplish:**

- a. Land will become fertile and become resourceful due to the training and latest scientific input for farmers. The land will give better return and yield and will also increase number of crops.
- b. Discrimination and violence against women and female children will come down as women will be empowered with economical empowerment due to the enhanced earning and independency due to the skilled training provided to them and income generation programs & Self Help Group activities.
- c. Family income will increase due to the program activities where farmers getting sufficient knowledge of farming techniques and the women are able to learn new skills for income generation, the family income will increase & the poverty will be alleviated.
- d. Reduction in malnutrition & post and prenatal deaths and life expectancy will increase. Our health program will create awareness and health education along with medical care. This will result in longevity of life and reduction in number death due to malnutrition and also in post & prenatal deaths.
- e. Girl children will be encouraged by the supply of cycles to continue to study without being dropped resulting in better education and gender equality.

### **III. Assessment of the changes:**

- a. Reduction in the number and amount of debts of the farmer from agricultural loans taken from the local bank and money lenders.
- b. Reduced number of people visiting the local primary health centre and reduction in number of deaths of children and young adults.
- c. Reduction in the number of school dropouts and increase in the number of students pursuing their studies compared to previous years.
- d. Increase in gender equality: When more women of the community decide to establish an income generating source and more girls begin to attend schools, we understand that the activity is bearing fruit.
- e. The reduction in number and quantity of plastic bags and the general cleanliness of the streets will indicate climate change adaption.
- f. Reduction in number of people who will go out of the village to fetch water and reduction in number of skin disease due to shortage of water will indicate the outcome of this program.
