# Custom Capabilities

---

## Single Color Pad Print

Direct single color pad prints use the Pantone color system and apply the ink via an offset printing process to transfer the ink from an etched plate to the mug surface.

## Multi Color Pad Print

Direct multi color pad prints use the Pantone color system and apply the inks via an offset printing process to transfer the inks from an etched plate to the mug surface.

## Laser Engraving

Laser Etching vaporizes the material from the surface of the mug, revealing the stainless-steel underneath leaving a sleek and high quality finished logo.
