Installation Instructions

Here's how to apply your decal

Before you begin, rub a credit card (or similar) over the decal
to prepare it for application.

1 Clean

Clean the surface with a mild cleaner such
as a window cleaner. Allow to dry.

2 Position and Peel

Carefully peel off the backing paper from the decal
(only the vinyl and the clear application tape
should remain) and position in place.

3 Apply

Starting from one end, place the decal down.
Use a credit card to rub down well with pressure.

4 Remove

Slowly peel the clear application tape away.
If the decal lifts, repeat step 3.
