

Brief description E037

What is E037?

If you see error code E037 on the display screen, it indicates a brake abnormality.

Why does it occur?

The usual causes for this issue are that there is an poor contact on the brake sensor cable.

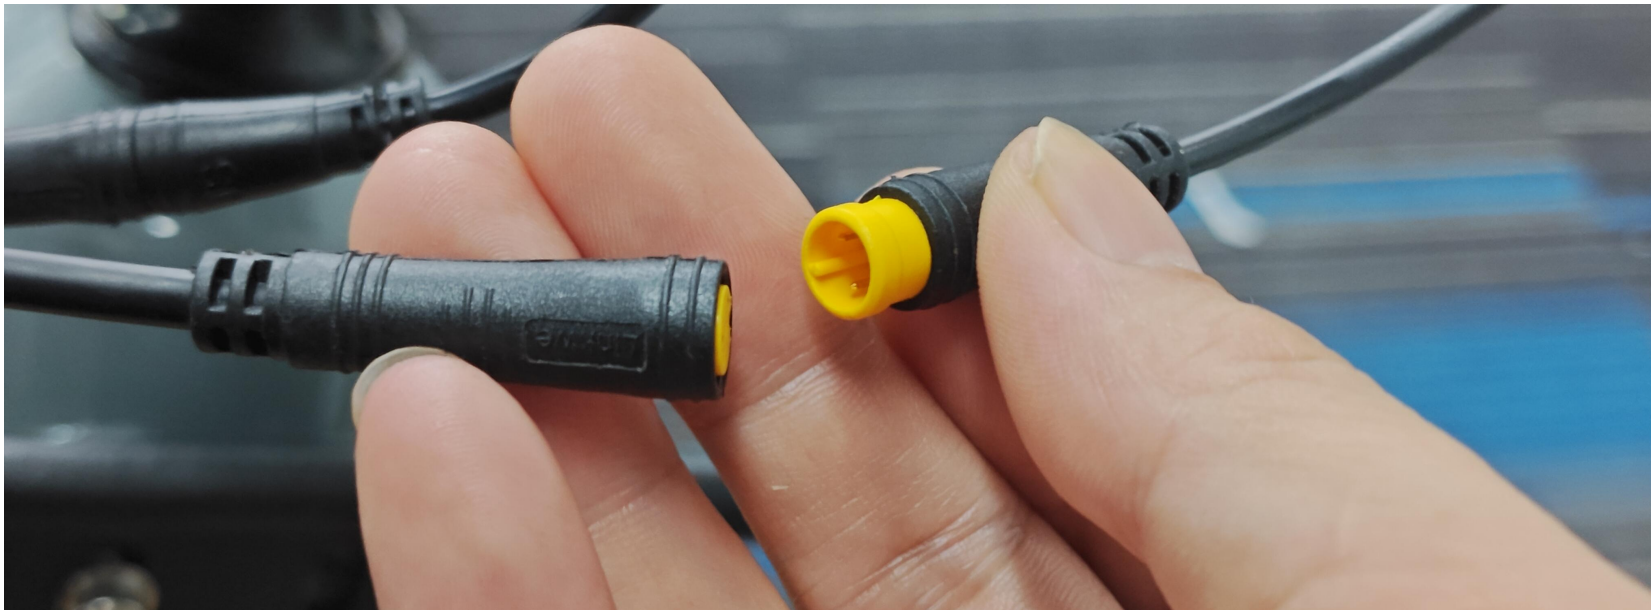

The yellow labeled ones as shown in the picture below are the brake sensor cables, one on the left and one on the right.

Troubleshooting

1. Which sensor works unwell?

Reconnect the left and right sense cable separately until the E37 code disappears (For example, if E37 disappears after disconnecting the left side the trouble point is on the left side) .

2.How to fix it?

Remove the lever firstly and unscrew the ① fixing screw, then tighten or

loosen the ②nut shown below until the E37 code disappear.

PS: If the problem persists, please contact the customer service team.
