5.3 ADVICE FOR FIRE FIGHTERS:

Firefighters should wear full firefighting turn-out gear (full Bunker gear) including NIOSH approved selfcontained breathing apparatus (SCBA) with full face piece operated in the pressure demand or other positive pressure mode.

Special protective equipment and

precautions for firefighters: Firefighters must use standard protective equipment including

> flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. Structural firefighter's protective clothing will only provide limited protection. Wear self-contained breathing apparatus with a full face piece operated in the positive pressure demand mode when fighting

fires.

Firefighting equipment/instructions: In case of fire and/or explosion do not breathe fumes. Use

> standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. Water runoff can cause environmental damage. Ventilate closed spaces before entering them. Keep

run-off water out of sewers and water sources.

According to US OSHA, CMA, ANSI, Canadian WHMIS Standards, Australian Worksafe, Japanese Industrial Standard JIS Z 7250:2000, Regulation (EC) No. 1272/2008, Regulation (EC) No. 1907/2006, Commission Regulation EU No. 2015/830 and Regulation (EU) 2020/878

6.1 PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES:

Keep unnecessary personnel away. Wear appropriate protective equipment and clothing during clean-up. Avoid breathing gas. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

6.2 ENVIRONMENTAL PRECAUTIONS:

Prevent further leakage or spillage if safe to do so.

6.3 SPILL AND LEAK RESPONSE:

Small Spills: Contain the area Large Spills: Contain the area

SECTION 7: HANDLING AND STORAGE

7.1 PRECAUTIONS FOR SAFE HANDLING: Use with adequate ventilation. Wear suitable protective

equipment during handling. Avoid breathing dust, fume or vapors. Wear protective gloves. Wash thoroughly after

handling. Protect from moisture.

7.1.1 HYGIENE MEASURES: Wash hands and other exposed areas with mild soap and

water before eating, drinking or smoking and when leaving

work.

7.2 CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES:

Technical Measures: Ensure the ventilation system is regularly maintained and

tested. Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of mists and/or vapors below the recommended exposure limits. A washing facility/water for eye and skin cleaning purposes should be

present. Comply with applicable regulations.

Storage Conditions: Keep containers tightly closed in a dry, cool and well- ventilated

place.

8.2 EXPOSURE CONTROLS:

The following information on appropriate Personal Protective Equipment is provided to assist employers in complying with OSHA regulations found in 29 CFR Subpart I (beginning at 1910.132) or equivalent standard of Canada, or standards of EU member states (including EN 149 for respiratory PPE, and EN 166 for face/eye protection), and those of Japan. Please reference applicable regulations and standards for relevant details.

Personal Protective Equipment:

avoid all unnecessary exposure. A hazard assessment of the work area for PPE requirements should be conducted by a qualified professional pursuant to OSHA regulations. For certain operations, additional personal protection equipment (PPE) may be required i.e. Protective goggle, gloves, protective clothing.

Respiratory protection:

Wear a self-contained breathing apparatus and appropriate personal protective equipment (PPE) or NIOSH approved respirator. Suggestions provided in this section for exposure control and specific types of protective equipment are based on readily available information. Users should consult with the specific manufacturer to confirm the performance of their protective equipment. Specific situations may require consultation with industrial hygiene, safety, or engineering professionals. Care must be taken to assure that any respirator chosen is capable of protecting the user from both ammonia and ethyl alcohol vapors.

Eye Protection:

Safety glasses or goggles are recommended.

If necessary, refer to U.S. OSHA 29 CFR 1910.133, Canadian Standards, and the European Standard EN166, Australian Standards, or relevant Japanese Standards.

Hand Protection:

Glove material: Viton (R) Gloves must be inspected prior to use. Replace when worn. Protective gloves against cold (EN 511)

Remarks: Supplementary note: The specifications are based on information and tests from similar substances by analogy. Due to varying conditions (e.g. Temperature or other strains) it must be considered that the usage of a chemical protective glove in practice may be much shorter than the permeation time determined in accordance with EN 374. conditions of practical use often deviate from standardized conditions according EN 374 the glove manufacturer recommends using the chemical protective glove in practice not longer than 50% of the recommended permeation time. Manufacturer's directions for use should be observed because of great diversity of types. Suitable gloves tested according EN

374 are supplied

Use body protect appropriate to task being performed.

If necessary, refer to appropriate Standards of Canada, or appropriate Standards of the EU, Australian Standards, or relevant Japanese Standards. If a hazard of injury to the feet exists due to falling objects, rolling objects, where objects may pierce the soles of the feet or where employee's feet may be exposed to electrical hazards, use foot protection, as described

in U.S. OSHA 29 CFR 1910.136.
