

HD Acrylic Information Guide

ACRYLIC

Hema Free

Designed by Professionals for Professionals

Our HD Pro Acrylic system has been carefully formulated to work perfectly together to create strong, durable but flexible enhancements. Both our core monomers are HEMA free, Optimal monomer is designed to ensure unsurpassed adhesion due to it having a small amount of built in primer and both are non-yellowing due to the uv stabilisers which ensures colour stability & brightness. Both the Optimal and Adhere monomers are EMA based. Optimal liquid is a faster set monomer for technicians who like to work quicker whilst Adhere is a medium set monomer ideal for those techs who like more working time. All our powders are designed to work perfectly with either monomer.

Bond It! primer

Bond It! A non-acid based primer leaving a surface to aid in adhesion for even the most troublesome nails.

Use as a primer with gel or acrylic. Apply like polish onto natural nails or new growth, let sit for 60 seconds. It will leave a tacky surface that can help eliminate lifting problems. Do not touch the surrounding skin or cuticles.

Prime It! primer

Prime It! A HEMA free & non-acid based primer leaving a surface to aid in adhesion for even the most troublesome nails.

Use as a primer with gel or acrylic. Apply like polish onto natural nails or new growth, let sit for 60 seconds. It will leave a tacky surface that can help eliminate lifting problems. Do not touch the surrounding skin or cuticles.

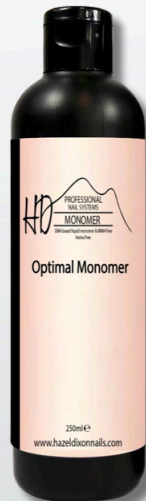

Adhere Monomer

Our Adhere monomer is formulated to give you exceptional workability when used with our HD Pro powders. Carefully designed to ensure strength, flexibility, excellent adhesion and is non-yellowing due to the uv stabilisers which ensures colour stability & brightness. Adhere is an EMA based liquid monomer and is HEMA free.

Its cure time is "normal" giving you time for perfect application, great for techs who work in a warmer environment or for newer technicians.

Adhere monomer requires the use of our Prep It! X (dehydrator) and Bond It! OR Prime It! primer before product application.

Optimal Monomer

Our Optimal monomer is formulated to give you exceptional workability when used with our HD Pro powders. Carefully designed to ensure strength, flexibility, excellent adhesion and is non-yellowing due to the uv stabilisers which ensures colour stability & brightness. Optimal is an EMA based liquid monomer and is HEMA free.

Its cure time is faster than adhere for techs that like to work quicker or great for techs who work in a cooler environment. Optimal monomer requires the use of our Prep It! X (dehydrator) and Bond It! OR Prime It! primer before product application.

Core & Cover Pink Powders

Our core acrylic dries to a velvety smooth finish due to the fineness of our powders which means less filing for that perfect finish. All of our core & cover Pink range of powders are perfect for nail bed extensions, one colour overlays and more.

Coloured & Glitter Powders

All our coloured & glitter powders are designed to work perfectly with our Adhere & Optimal liquid monomers. They offer excellent coverage due to the high pigmentation and a bubble free finish when applied correctly ensuring high clarity and brightness of colours. Perfect for fun french, ombre and 3d techniques. We have a wide variety of colours to suit every technician needs. Our acrylic dries to a velvety smooth finish due to the fineness of our powders which means less filing for that perfect finish. We recommend that all our colours be capped with clear.

FEATURES & BENEFITS

- Great Formulation for new techs
- Slower setting time than Optimal
- Great adhesion
- Long lasting - use with tips or forms
- Can be used for added strength, overlays & extensions
- Perfect for Pinching
- No animal testing & Vegan Friendly
- Setting time in normal conditions around 3-5mins
- HEMA FREE
- Great for allergy sufferers

AVAILABLE IN:

250ml

500ml (2pk)

AVERAGE SETS PER 250ml BOTTLE

40-50 salon length - 20-25 long length

These are approximate and may vary greatly depending on the length of the nail and the amount of product applied.

Manufactured responsibly to UK & EU Regulations

Education & Training available with the Award winning Hazel Dixon Nail Artist Academy

Training Available

Discover our award-winning education program, specifically designed to showcase the art of nail enhancements using our luxurious HD Acrylic Range. Our comprehensive training courses equips beauty professionals with the skills and knowledge to deliver exceptional acrylic enhancements & overlays.

- **Expert-Led Training:** Learn from industry-leading professionals who bring years of experience and a wealth of knowledge to each session.
- **Hands-On Practice:** Gain practical experience with hands-on training that allows you to master each step of the enhancement process.
- **Comprehensive Curriculum:** Covering everything from basic techniques to advanced treatments, our program ensures you become proficient in delivering top-quality services.
- **Product Integration:** Learn how to effectively incorporate our Acrylic Range into your services, enhancing the overall client experience with our premium products.
- **Accreditation:** Earn a certification upon completion that is ABT accredited, which is recognised by top salons and spas.
