Lamp Testing Declaration

HD Professional Nail Systems can confirm that All HD Pro Nail gel systems and products have been fully tested by McConnell Labs Inc for compatibility with the Akzentz Hybrid Pro UV/LED Lamp and the Light Elegance UV/LED Dot Lamp.

Both curing lights #1 and #2 are determined to perform sufficiently well after 60 seconds to cure the HD Professional Nail Systems gel products in such a manner as to reduce the potential risk of allergic reaction over a period of years so long as skin exposure to uncured gel during the application. ^{Office Dictation} cleansing of the gel is kept to a minimum. Precautions should always be taken to not expose any living tissue to uncured acrylates or methacrylate's as exposure to these types of chemicals is known to possibly result in the development of allergic reactions.
