

Carisma SC Nursing Bed

Functional. Intelligent. Dignified.

Helping your care.

About

The low nursing bed carisma sc is the solution for retirement and nursing homes that strive for functionality and comfort. This innovative nursing bed was developed to optimally meet the needs of both caregivers and residents in the best possible way.

With its outstanding features such as SafeFree® side rails, which can serve as mobilization aids and effective concepts for active falls prevention, the carisma sc offers a unique combination of safety, autonomy and well-being. The carisma sc healthcare bed can help you to create the best possible care environment for your residents.

Your Benefits at a Glance

Mobilise Individually

Preservation and promotion of individual mobility:

- The 4 adjustable heights of the side rails can be used as a stand-up aid.
- The optionally available SafeSense® bed-exit-system empowers independent self-mobilisation.

Effective Falls Prevention

Effective falls prevention is essential in elderly care:

- The safe sleeping height of 25 cm reduces the risk of serious fall.
- The side rails can be adapted to the room concept or individual protection needs of the resident.

Care Ergonomics

Ergonomics in the nursing routine to support the nursing staff:

- The ergonomic nursing height of up to 80 cm enables back-friendly work.
- Automatic positions can be set at the touch of a button on the handset.

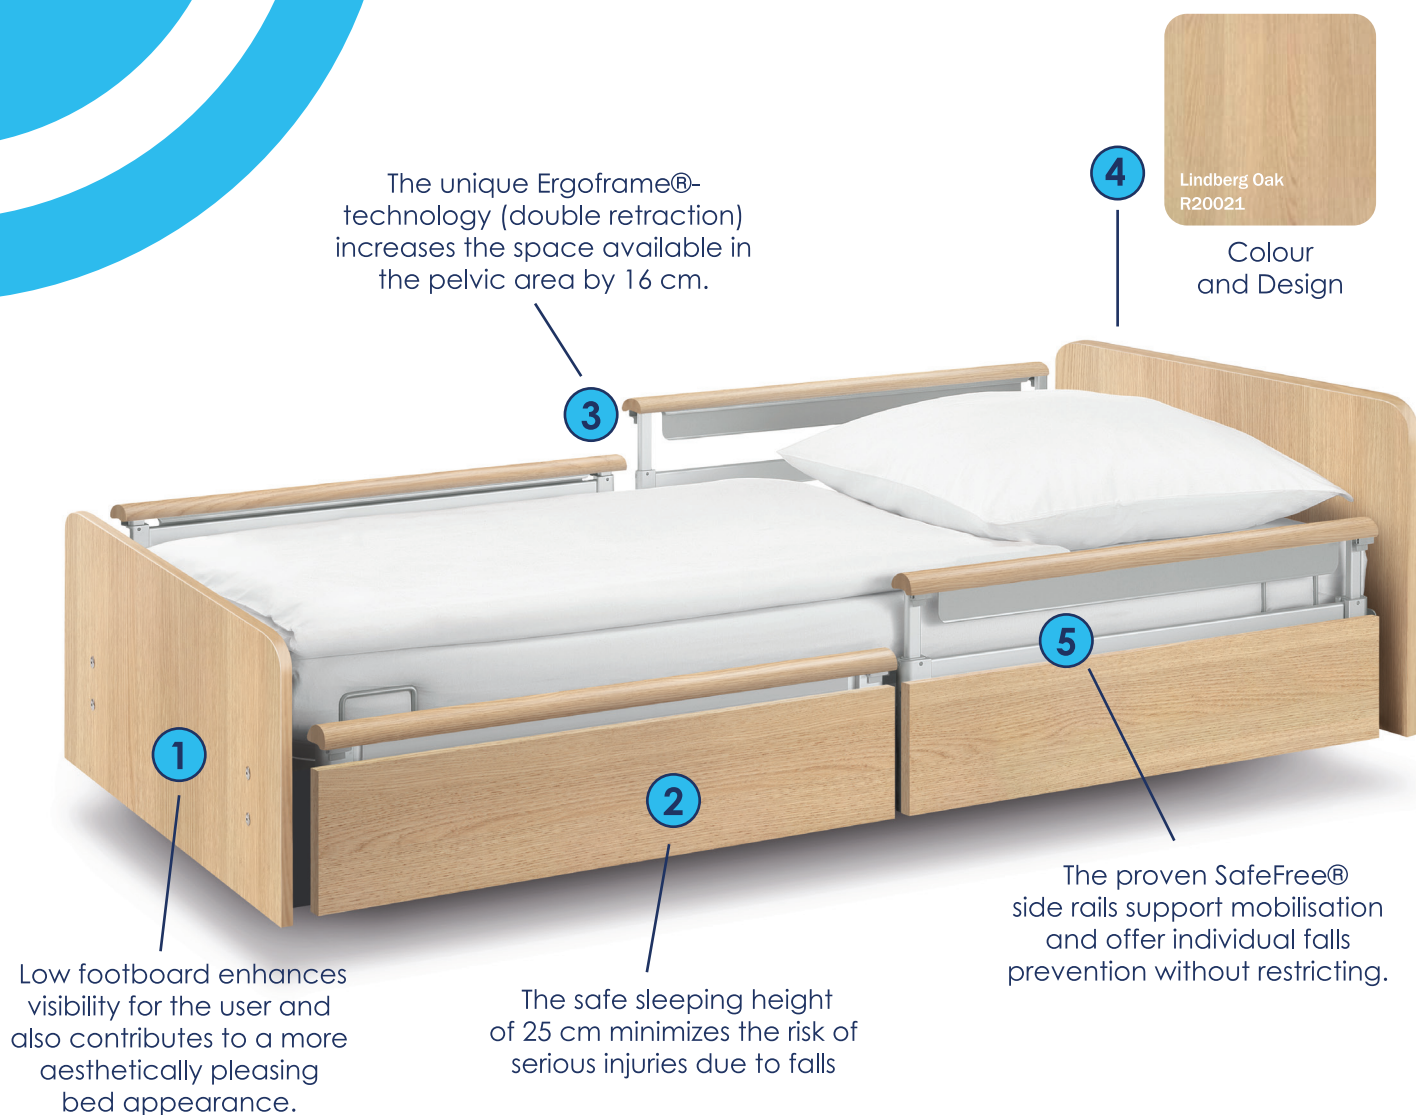

Comfort For Residents

Homely design and functionality to make residents feel at home:

- A wide range of mattresses are available to meet different needs.
- The backlighting of the handset facilitates operation even in the dark.

‘Comfort and
functionality
for everyone’,
