

# Glow Crib Light

Always undisturbed,  
Always together

Glow Crib Light gives you peace of mind that your baby can continue to sleep undisturbed when you check in on them throughout the day or night. A smart motion detector turns soft lights on when you approach the crib and automatically dims when you leave the nursery; so you never have to turn the big light on and risk waking your baby. Via the Connected Home app, you can personalise settings to control distance, timers, schedules, light colour and brightness.

- **Smart motion detection**
- **Interacts with other products via the Connected Home app**
- **Customisable settings**
- **Easy installation**

## Features

- Remote control
- Timers
- Brightness & color adjustment
- Compatible with Amazon Alexa & Google support
