**DESCRIPTION**

BESTOLIFE® GGT-RSC-HT is an economical non metallic thread compound for rotary-shouldered connections. Recommended for medium to heavy duty drilling, the compound applies easily in a range of temperatures and conditions. GGT-RSC-HT is resistant to washout and will not harden or bleed excessively in storage. NSF H2 registered.\*\*

**APPLICATIONS**

Non metallic, non conductive compound for rotary-shouldered connections.

**TECHNICAL DATA**

BESTOLIFE® GGT-RSC-HT contains a high percentage of amorphous and synthetic graphite, as well as other inert solids, in a high-temperature base grease formulated with antiwear and oxidation inhibitors. In addition to the galling and seizing protection provided by the solids, GGT-RSC-HT also contains a soluble extreme pressure package that is surface active (adheres to metal surfaces) and helps to provide the load-carrying capability required by the high-bearing stresses present in rotary-shouldered connections. It is recommended for medium to heavy duty drilling.
