BRACING AND SUPPORTS

SPORT XTREME

Champion's Sport Xtreme (CSX) line of braces and supports are engineered to withstand the demands of the elite athlete. CSX products are the result of years of research, design and rigorous testing by experts in the field of sports medicine. No detail was overlooked to reach our goal of providing a seamless blend of comfort, durability and unsurpassed functionality all in a sleek contemporary design. Whether the consumer is an elite athlete or someone with an active lifestyle who demands the best performance available, CSX will provide the support they need and the look they want.

TECHNOLOGY AMPLIFIED

A brace is not just a brace! It must provide the right amount of support and range of motion in the right areas to deliver the comfort and confidence the consumer needs to perform at their highest level. Only the latest, premier quality, sports specific materials were used in the construction of the CSX line. Employing the most effective and lightweight materials in the right areas of the human anatomy is a mixture of both art and science. Non-allergenic and latex free breathable neoprene, wicking mesh for moisture management and the latest non-abrasive fastening technology combine to enhance comfort, fit and function.

PERFORMANCE AMPLIFIED

KNEE SUPPORTS

KNEE SUPPORT WITH FLEXIBLE SIDE STABILIZERS

X525

- Anatomically engineered for a precision fit
- Non-abrasive fastening technology
- Easy-on/easy-off finger pulls
- Gel patella insert with cool wicking mesh
- Optimum support side stabilizers
- Reversible & adjustable straps to customize position & compression

MEASURE AROUND KNEE AT THE WIDEST POINT

SMALL	12.5"-13.75" / 31.8 cm-34.9 cm
MEDIUM	13.75"-15" / 34.9 cm-38.1 cm
LARGE	15"-16.25" / 38.1 cm-41.3 cm
X-LARGE	16.25"-17.5" / 41.3 cm-44.5 cm
2X-LARGE	17.5"-18.75" / 44.5 cm-47.6 cm

KNEE SLEEVE SUPPORT

X515

- Anatomically engineered for a precision fit
- Easy-on/easy-off finger pulls
- Comfort-mesh panel behind knee
- Flexible patella opening

MEASURE AROUND KNEE AT THE WIDEST POINT

SMALL	12.5"-13.75" / 31.8 cm-34.9 cm

Wrap-around straps provide customized support, warmth and compression for the calf muscle

Can be used to secure hot or cold therapy devices for post-workout

UNIVERSAL ADJUSTMENT FITS MOST ADULTS

COMPRESSION SOCKS AND CALF SLEEVES PRO ANKLE SOCKS

MORE THAN JUST COMPRESSION

CSX Compression products are designed to give athletes and active people the decisive edge in performance, injury reduction and recovery. Built with the greatest support at the ankle that reduces gradually up the leg, they work to reduce the diameter of the superficial veins in the lower leg and thus help improve blood flow. Improved flow can help protect, energize, and renew tired muscles.

It is known that improved circulation enhances oxygen, nutrient, and waste exchange to the tissues, allowing for increased muscular power, less fatigue during performance and quicker recovery. Additionally, CSX Compression products include built-in shin splint protection and calf muscle support to help reduce vibration and aid in the prevention of common impact injuries. Arch, ankle and Achilles support in the compression sport socks provide an extra layer of comfort and support contributing to increased stabilization during the most demanding activities.

COMPRESSION SOCKS/SLEEVES AND PRO ANKLE SOCKS

MARKETING SUPPORT

WE UNDERSTAND THAT EVERY ORGANIZATION HAS VERY SPECIFIC NEEDS WHEN IT COMES TO MARKETING SUPPORT FROM ITS VENDORS. CSX HAS ITS OWN IN-HOUSE MARKETING AND CREATIVE TEAMS, AS WELL AS A VIDEO/PHOTOGRAPHY STUDIO. THIS ALLOWS US TO CATER TO YOUR SPECIFIC NEEDS!

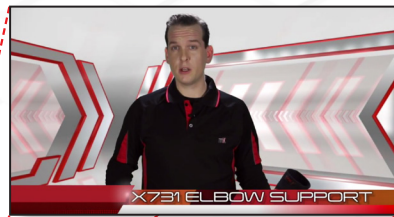

ONLINE AND OFFLINE

- Promotional videos advertising the products
- Online communities and social media marketing that drives sales and brand loyalty
- Brand awareness through online and offline advertising and promotions
- Print marketing collateral to help educate consumers and drive sales
- In-store displays that provides clear information and nicely displays the product

ACTIVE IN ATHLETIC COMMUNITIES

- Attend industry to consumer events
- Actively engaging with various athletic groups
- Outreach to bloggers within the athletic community
- Sampling with pro and semi-pro athletes
- Brand ambassador program
- An impressive catalog of video testimonials from everyday consumers who have been directly engaged

DYNAMIC PACKAGING THAT SELLS

- QR code that links to a product demonstration video, providing more information about the product while serving as a "Virtual salesperson"
- Size labels clearly displayed
- Bold use of graphics and colors throughout
- Product images clearly shows all features and components
- Specific product features and user benefits
- Where to measure for the product and how to choose the correct size
