

# Trailhead

SuperFabric® provides industry leading performance and versatility. Water repellent, highly abrasion and stain resistant while being breathable and quick drying.

Mesh lining provides a super comfortable fit while also helping to keep your foot cool and dry.

Sewn loop to help put on shoes or clip them to hang.

A blend of EVA and synthetic rubber insole that provides a comfortable ride topped with a ribbed polyester fabric that wicks moisture and is removable if you want to use an orthotic.

Zero-drop sole. Our shoes allow your feet to lay flat on the ground, as nature designed. The raised heel in most shoes puts undo stress on the calve muscles, achilles tendon and forefoot.

Outsole does not get clogged with mud and debris while providing secure traction and a smooth ride.

A wide toe box to ensure the shoe allows your toes to lay in their natural flat position. This allows for improved balance, posture and air flow.

- Barefoot feel means maximum comfort
- Extremely versatile from minimalist running to everyday use
- Our most technical outdoor shoe
- Vegan = no animal products
- Ethically made in the USA!

Sizes (4.5 - 14)

Weight : One size 9 shoe weighs 8.65oz (245g)
