1. Find an open, flat area in which to work. Carefully remove all components from the box and remove banding with a utility knife. Check the parts list to verify package contents.
2. Insert a scalloped leg into one of the notched slots on the foot piece. Use provided screws to attach each scalloped leg to a foot piece using the pre-drilled holes. Make sure the front of the scalloped leg is flush with the end of the foot piece.

3. If you purchased more than one scalloped rack, attach each rack using the provided wood dowels. Simply push the dowels into each notch on the top of your rack. Then, line up the holes on the upper rack and carefully press into place. Repeat this step for all remaining scalloped shelves.
