GOLF ENCLOSURES

SimSpace Home Golf Simulator Safety Guidelines

Introduction

Welcome to SimSpace! Your safety is our top priority. Please read and follow these guidelines thoroughly to ensure a safe and enjoyable experience with your home golf simulator and enclosure.

1. Installation

- **Frame Kit Assembly:** Start by organising your frame kit by size and shape. Your SimSpace kit includes steel tubes, a black knit fabric ceiling panel, two wall panels, an impact screen, optional foam inserts, and ball bungees. Our enclosures are designed to be constructed by two people without the need for tools. Detailed assembly instructions are included to guide you step by step.
- **Professional Assistance:** Although our kits are designed for straightforward assembly, we recommend that installation is carried out by at least two adults to ensure safety and accuracy.

2. Choosing the Right Location

- **Space Requirements:** Select a spacious, well-ventilated indoor area with minimal foot traffic. Ensure the space has at least 50cm behind & 20cm on either side of the enclosure as a buffer space for ball impacts. A tall ceiling of at least 3 metres for ceiling-mounted equipment, and sufficient horizontal clearance for a full golf swing.
- **Safety Considerations:** Consider whether children or pets will have access to the room. Using a closed room, baby gates, or exercise pens may be necessary to prevent accidents.

3. Installation Safety

- **Follow Instructions Closely:** Read all installation instructions and watch the provided video from start to finish before beginning your setup. Pay attention to safety tips and potential hazards noted in the documentation.

4. Equipment Setup

- **Power Supply:** Connect all electrical components to a surge protector. Organise cords to prevent tripping.

- **Projector and Screen Setup:** Securely mount projectors and ensure the screen is tightly fastened. Check regularly for wear and tear.

5. Play Safety

- **Inspect Equipment:** Before each use, inspect the equipment for any signs of damage or wear. Immediately replace damaged components.
- **Pad Hard Surfaces:** Pad all hard surfaces near the net or screen to reduce the risk of injury from ricocheted balls. If there is room on the wall beside the net or screen, ensure it is also padded.
- **Clearance and Spacing:** Ensure all persons maintain a safe distance from the swing area during use. Perform practice swings to confirm enough clearance without hitting any surrounding objects.

6. Maintenance

- **Regular Checks:** Perform regular checks and maintenance to ensure optimal safety and performance.
- **Software Updates:** Keep the software up to date to incorporate the latest safety features and improvements.

7. Emergency Procedures

- **Power Failure:** Familiarise yourself with how to manually shut down the system in an emergency.
- **First Aid:** Keep a first aid kit accessible and understand basic first aid procedures.

8. Contact Information

- For any safety concerns or maintenance queries, please contact our support team at:
 - Phone: + 44 (0) 1253 407272
 - Email: customerservice@secondchance.co.uk

Conclusion

Enjoy your SimSpace Golf Simulator responsibly. Adherence to these guidelines will greatly enhance your golfing experience and safety. Remember, SimSpace enclosures are intended for golf use only.
