

Cybersecurity Services for Boards of Directors

OVERVIEW

We are in an era of unprecedented change, and Boards of Directors are at the forefront of navigating the complex and dynamic business landscape. The strategic decision-making in an uncertain environment and the need to maintain a strong organizational culture are critical aspects that demand constant attention from the Board. Globalization, rapid technological evolution, and the increasing interconnectedness of economies present constant challenges, requiring Boards to have a deep understanding of emerging risks and opportunities. In this scenario, the ability to anticipate changes, lead innovation, and efficiently manage resources and risks becomes essential to address current and future challenges. By 2025, half of the Boards of Directors will have a specific cybersecurity committee.

SOLUTIONS

At Zerolynx, we deeply understand the companies needs and aim to comprehensively address them by designing, implementing, maintaining, and operating cybersecurity plans based on the six areas of NIST:

- **Govern:** We align your organization's IT activities with its business objectives, manage risks, and ensure compliance with laws and regulations such as DORA, National Security Frameworks, Data Protection Acts/GDPR, or NIS2.
- **Identify:** We detect leakages, exposed data, malicious actors, breaches, and other threats to prevent potential new actions that could lead to a cyber incident.
- **Protect:** We reduce your organization's attack surface, ensuring the least privilege and creating a hostile environment that hinders the free movement of any malicious actor, implementing customized solutions.
- **Detect:** We analyze and assess the cybersecurity capabilities of your company through ethical hacking exercises and red teaming conducted on your external perimeter, internal networks, Cloud environments, or your suppliers' environments.
- **Respond:** We assist in containing potential cyber incidents and investigating their origin to prevent new breaches.
- **Recover:** We provide support to restore the normal activity of the company, developing improvement plans and lessons learned.

KEY FIGURES

- By 2025, 40% of Boards will have a **cybersecurity committee** overseen by an expert.
- 90% of **Boards of Directors** have **cybersecurity** on their roadmap.
- 50% of **companies** with a Board of Directors confirm that they **outsource their cybersecurity capabilities to expert companies**.

"Having Zerolynx as technical experts for the internal cybersecurity audits we conduct at Exolum Group has allowed us to bring value to the organization by identifying areas for improvement and contributing to the strengthening of cybersecurity in corporate systems in both IT/OT and verified processes"

Gema Hernández
Deputy Director of Audit and Compliance
at Exolum Corporation
