ZEROLYNX | OSANE CONSULTING
A ZEROLYNX COMPANY
CYBERSECURITY & INTELLIGENCE

Cybersecurity Services for **CISOs**

OVERVIEW

In their day-to-day activities, Chief Information Security Officers (CISOs) face numerous challenges: talent shortages, diffuse security perimeters, data breaches, constant changes in regulations, and increasingly sophisticated cyberattacks. The rapid technological evolution and complexity of modern architectures, along with a lack of security awareness and pressures for innovation, expand the attack surface. Internal incidents, the evolving cyber threat, and resource limitations make their management more complicated. To address all these challenges, CISOs must adopt comprehensive strategies, collaborate with other areas and external entities, and stay updated on the latest trends in cybersecurity.

SOLUTIONS

At Zerolynx, we deeply understand the needs of CISOs and aim to comprehensively address them by designing, implementing, maintaining, and operating cybersecurity plans based on the six areas of NIST:

- **Govern:** We align your organization's IT activities with its business objectives, manage risks, and ensure compliance with laws and regulations such as DORA, National Security Frameworks, Data Protection Acts/GDPR, or NIS2.
- **Identify:** We detect leakages, exposed data, malicious actors, breaches, and other threats to prevent potential new actions that could lead to a cyber incident.
- **Protect:** We reduce your organization's attack surface, ensuring the least privilege and creating a hostile environment that hinders the free movement of any malicious actor, implementing customized solutions.
- **Detect:** We analyze and assess the cybersecurity capabilities of your company through ethical hacking exercises and red teaming conducted on your external perimeter, internal networks, Cloud environments, or your suppliers' environments.
- **Respond:** We assist in containing potential cyber incidents and investigating their origin to prevent new breaches.
- **Recover:** We provide support to restore the normal activity of the company, developing improvement plans and lessons learned.

KEY FIGURES

- **72% of companies that experienced an incident** did **not have their ISMS certified**.
- **33% of CISOs** consider that their organizations are **not prepared to face a cyber incident.**
- **95% of CISOs** asserts that **the most important and complex aspect of their agendas** is **being involved** in all the **projects** of their organizations.

"Orange has maintained a strong alliance with Zerolynx for over 5 years, being one of our preferred partners for providing cybersecurity services to large accounts. Additionally, Zerolynx supports us in our internal cybersecurity, participating in multiple projects across various branches. Undoubtedly, Zerolynx is a highly recommended ally"

José Ramón Monleón
CISO of Orange Espagne
