Using Your Slow Cooker

Pre-heat the oil in the Cooking Pot (3) on the hob over a medium-high heat. The Cooking Pot (3) is compatible with most hobs, except induction.

When the oil is hot, add the meat in to the Cooking Pot (3). **WARNING: The Cooking Pot (3) will be hot. Handle with oven gloves.**

When cooking has finished (refer to the cooking guide on page 9), turn the Control Knob (7) to Off. The Indicator Light (6) will switch off.

Handling The Cooking Pot

- **WARNING:** The Cooking Pot (3) will become very hot when in use.
- To prevent the Cooking Pot (3) from slipping when using to sear, saute or fry the ingredients on your hob, use an oven glove to support the Cooking Pot (3) when stirring the food.
- Be careful when using the Cooking Pot (3) on a gas hob, select the correct size gas ring to fit the base area of the Cooking Pot (3). **DO NOT** use on a wok burner or oversized gas hob.
- Do not use metal utensils to stir food in the Cooking Pot (3) as this will scratch and remove the non stick coating. Use either wood or silicone plastic utensils.
- **WARNING:** The Lid handle (1), the Base Unit (4) and the Cooking Pot (3), as well as the outside of the Base Unit, all become hot during cooking. Always use oven gloves when handling ANY part of the Slow Cooker during cooking.

Handling The Glass Lid

- When removing the Glass Lid (2), tilt so that opening faces away from you to avoid being burned by steam.

Foods For Slow Cooking

- Most foods are suited to slow cooking methods, however there are a few guidelines that need to be followed.
- Ensure all frozen ingredients are thoroughly defrosted prior to cooking.
- Cut root vegetables into small, even pieces, as they take longer to cook than meat. They can be gently sauteed for 2-3 minutes before slow cooking. Ensure that root vegetables are always placed at the bottom of the Cooking Pot (3) and all ingredients are immersed in the cooking liquid.
- Trim all excess fat from meat before cooking, as the slow cooking method does not allow fat to evaporate.
- If adapting an existing recipe from conventional cooking, you may need to reduce the amount of liquid used. Liquid will not evaporate from your Slow Cooker to the same extent as conventional cooking.
- Never leave uncooked food at room temperature in your Slow Cooker.

- Uncooked kidney beans must be soaked overnight and boiled for at least 10 minutes to remove toxins before use in a Slow Cooker.
- Insert a meat thermometer into joints of roasts, hams or whole chickens to ensure they are cooked to the desired temperature.
- **Do not use your Slow Cooker to reheat food.**

Slow Cooking Tips

- The Slow Cooker must be at least half full for best results.
- Slow cooking retains moisture. If you wish to reduce liquid, remove the lid after cooking and turn the control to High. Reduce the moisture by simmering for 30 to 45 minutes.
- If cooking soups, leave 5 cm gap from the rim of the Cooking Pot (3) and the food surface to allow for simmering.
- Removing the Glass Lid (2) will allow heat to escape, reducing the efficiency of your Slow Cooker and increasing the cooking time. If you remove the lid to stir or add ingredients, you will need to allow 10-15 minutes extra cooking time for each time you remove the Glass Lid (2).
- Many things can affect how quickly a recipe will cook, including water and fat content, initial temperature of the food and the size of the food. Check food is properly cooked before serving.
- Many recipes will take several hours to cook. If you don't have time to prepare food in the morning, prepare it the night before, storing the food in a covered container in the fridge. Transfer the food to the Cooking Pot (3) and add boiling liquid/stock. In most of the recipes in this book, the meat ingredients are browned first to improve their appearance and flavour.
- If you are short on preparation time and would prefer to skip the searing stage, simply add your meat and other ingredients into your Slow Cooker and cover with boiling liquid/stock. You will need to increase the recipe cooking time as follows: High setting +1hr, Medium setting +1-2 hrs, Low Setting +2-3hrs.
- Most meat and vegetable recipes require 8-10 hours on Low Setting, 6-8 hours on Medium setting or 4-6 hours on High setting.
- Some ingredients are not suitable for slow cooking. Pasta, seafood, milk and cream should be added towards the end of the cooking time.
- Pieces of food cut into small pieces will cook quicker. A degree of 'trial and error' will be required to fully optimise the potential of your Slow Cooker.

- All food should be covered with a liquid, gravy or sauce. In a separate pan or jug, prepare your liquid, gravy or sauce and completely cover the food in the Cooking Pot (3).
- When cooking joints of meat, ham, poultry etc, the size and shape of the joint is important. Try to keep the joint in the lower 2/3 of the pot. If necessary, cut into two pieces. Joint weight should be kept within the maximum limit of 1kg.
- For ham and brisket fill with hot water to just cover the joint. For beef, pork or poultry cover to 1/3 depth.

Care And Cleaning

- Turn off and unplug you Slow Cooker from the mains. Allow to cool completely before cleaning.
- Do not use metal utensils or abrasive cleaners when cleaning.
- Remove the Glass Lid (2) and Cooking Pot (3) and clean in hot soapy water.
- Wipe the sides of the main unit with a damp cloth.
- The Glass Lid (2) and Cooking Pot (3) are dishwasher safe.

DO NOT IMMERSE THE BASE UNIT IN WATER

Caring For The Glass Lid And Cooking Pot

- Please handle the Glass Lid (2) and Cooking Pot (3) carefully to ensure long life.
- Avoid sudden, extreme temperature changes to the Glass Lid. For example, do not place a hot lid into cold water or onto a wet surface.
- Avoid hitting the Glass Lid (2) against any hard surfaces.
- Do not use the Glass Lid (2) if chipped, cracked or severely scratched.
- Do not use abrasive cleansers or metal scouring pads.
- Never heat the Cooking Pot (3) when empty, when searing or browning add the meat as soon as the oil is hot.
- Never place the Glass Lid (2) or Cooking Pot (3) under a grill, in the oven, in a microwave or toaster oven.
- Never place lid directly on a burner or hob.
- Do not use metal utensils when searing or to stir food in the Cooking Pot (3) as this will scratch and remove the non stick coating. Use either wooden or silicone plastic utensils.

Recipes

We have developed recipes for you to use in the Sear and Stew Slow Cooker. From soups for starters, curries for mains and rice pudding for dessert, there are choices for all tastes.

The cooking times given in the following recipes are for the Medium setting. Should you want to increase or decrease the cooking time, please refer to the cooking guide below. Please note that these cooking times are for guidance only and may vary depending on food type and personal tastes.

For example if the recipe says cook for 4-6 hours on Medium and you require the cooking time to be a shorter, cook on High, which will reduce the cooking time to 3-4 hours. To increase the cooking time, choose Low which will increase the cooking time to 6-8 hours.

The recipes are based on the maximum working volume of the slow cooker 2.5 litres / 4½ pts. This allows a 2cm space between the top of the pot and the food.
