INFORMATION

Sublimation is the process of dyeing a design into the material to create something truly unique. Long lasting and durable, this method allows for complete customisation. Where you see this  icon, the product is fully customisable

We use a range of technical fabrics across our product range. These materials have been chosen specifically for their durability and on the requirements of the particular product

All of our products have a minimum order quantity (MOQ). The MOQ varies from product to product, however these are both practical and realistic for our customers. Please see the individual product page for more information

Our standard lead times are 5-6 weeks. In exceptional circumstances we may be able to reduce this; get in contact if you are in need of products in less than 5-6 weeks

Formed in 2015 by two international lacrosse players, we have used our combined 40 years experience playing the game to develop a full range of lacrosse specific on and off field kit.

Using modern fabrics and contemporary fits, our range is focused on being high quality and durable whilst allowing players to perform at their peak.

Here at Pioneer Teamwear we care about the environment as much as we do about producing high quality clothing

That is why we offer our products in sustainable materials where possible. Where not currently possible, we are working with our suppliers to be able to provide sustainable fabrics across our entire range of clothing

We also package all our orders in either biodegradable or recycled packaging
