Visit our website for our full product listing at www.Casterland.com

Product

Our full line of bearings are manufactured by some of the leading manufacturers in the industry. In addition to the products listed in this catalog, many other products or special order items are available upon request. Please consult our order desk.

Limited Warranty: General Provisions

Casterland warrants to the original purchaser of its product that the product will be free from defects in material and workmanship for a period of 90 days after the date of delivery to the original purchaser.

This limited warranty is not effective with respect to products that are not properly installed or not used in the proper application based on loads, speeds and other factors. This warranty does not apply to products damaged or destroyed as a result of shipping.

Freight Policy

All goods ordered from this catalog are FOB our original purchase point warehouses and shipped via freight collect. Orders over \$500.00 may be eligible for a freight reduction of half the original freight cost to a major centre by a carrier of our choice. Any large orders or O.E.M. customers may be eligible for prepaid orders to a major centre by a carrier of our choice.

Pricing

Prices are subject to change without notice. Casterland makes an effort to hold prices for a minimum of one year, however, occasionally circumstances arise which are beyond our control.

Terms

We accept Visa, MasterCard, Debit, and net 30 days on approved credit. First time orders may be subject to COD terms or a maximum charge amount depending on credit approval.

Hours of Operation

Casterland is open from 8:00am to 5pm weekdays and 10am to 2pm Saturdays. Please call the branch nearest you for applicable hours of operation.

The difference of Precision ball bearings.

The bearing you select for your wheel has a great impact on the overall performance of your equipment.

Precision ball bearings require less maintenance than other bearing styles leading to lower maintenance costs. They are also an excellent method of increasing weight capacity.

The ergonomics of precision bearings also help in reducing injury or fatigue by improving rollability.

Regular Flanged Bearing
(not sealed or machined steel)

Sealed Precision

ROLLER BEARINGS

Roller bearings with sleeves are generally used in caster wheels, offering the best compromise between capacity, rollability and value in a bearing.

ROLLER BEARINGS

without sleeves

Sleeveless or open cage roller bearings are usually used in lawn and garden applications.

Washers and Top Hats - Selection and Installation Guide

Different bearing types require different combinations of washers to ensure proper operation of the wheel. Here is a brief guide:

- Retainer washers are used to "retain" or hold in place Roller Bearings.
- Thrust washers are used in conjunction with Retainer Washers to keep the caster fork legs from compressing against the side of the wheel.
- Double Nylon Washers are a combination of a Retainer Washer and Thrust washer together in one piece.
