CCTW50PLWSBR	50mm	Wood Stem	75 lbs	Brake

Helpful Hint...

Since all twin wheeled casters look alike, when selecting one it is best to bring a sample into a Casterland location so we can match the one that you need. You must bring in both the body and stem as stems are not interchangeable from one manufacturer to another. For office chairs the 7/16" Friction Ring Stem is most common.

EUROPEAN TWIN WHEEL CASTERS

Designed for our customers who use metric sizes, these German made twin-wheel casters can be mixed and matched with the stem types below to fit your needs.

BP SERIES 600 - 1000 lbs

This 2" wide caster is designed for easy swivelling and to take the abuse of rough, continuous service. It is constructed with a superior 5/8" nut and bolt kingpin with double ball raceways.

This caster is zinc plated for lasting wear and features a grease fitting in the swivel head for easy maintenance.

Also available in stainless steel.

For Side Brakes add "SB" at the end of the model number - eg. CCBP4200RMSRB

For Total Brakes add "TB" at the end of the model number - eg. CCBP4200RMSRB

Locking Information

Side Brake (SB)

Stops the wheel from rolling.

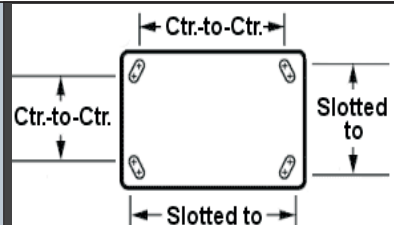

Total Brake (TB)

Stops both the wheel and swivel from moving.

Helpful Hint...

To ensure correct bolt hole spacing, measure from the center of one hole to the center of the next.

Locking Options

Side Brake (SB)

CCBP6200RMSRBSB

Total Brake (TB)

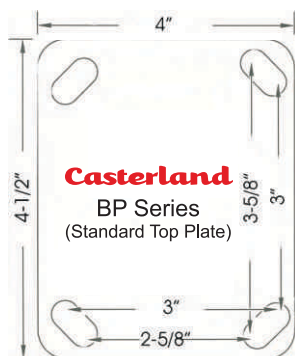

CCBP6200UCSRBTB

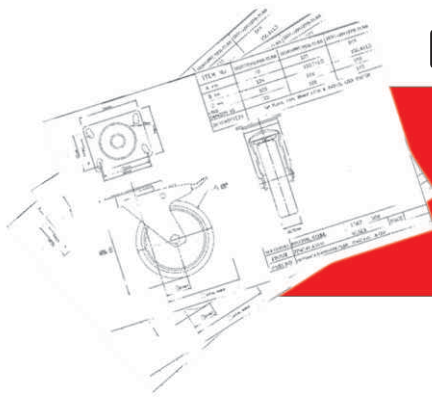

Floor Lock

CAFL 6

Floor Locks are mounted separately from the casters for an even better braking option.

If it can be done, we can do it!

Looking for something different for a unique application? Or one of our normal series with a different wheel type, size or option? Let us know!

Unique Stem Sizes

Part Number	Wheel Size	Weight Capacity	Stem Size	
DCLH 625 CI	2.5"	400 lbs	1/2" TS	 DCLN 625 CI
DCLN 625 CI	2.5"	400 lbs	5/8" TS	
DCLR 625 CI	2.5"	400 lbs	3/4" TS	

Floor Locks

Floor locks available in a variety of sizes to ensure rigidity in the most mobile of circumstances.

Pallet Jack Wheels

Ball Transfers

Require something to be moved easily in any direction? Many threaded stem and plate style models available.

DC31 SL404 PSEL

Model Number	Wheel Size	Capacity	Additional Details
DC31 SL404 PSE	4"	900 lbs	Swivel, spring loaded

Many sizes and materials of wheels available, please contact us for details!

Levelling Casters

Part Number	Wheel Size	Weight Capacity	
DRLV0300V4	3"	600 lbs	
DRLV0600V4	3"	1,300 lbs	

LV Series leveling casters have a die-cast aluminum frame with a steel swivel head, an internal leveling mechanism and dial, and a rubber foot pad. The foot pad can be adjusted to a level position and make the attached equipment completely stationary. A cast aluminum frame is powder coated in an ivory hue and the wheels are made of an ultra-strong, non-marking nylon.

Hilman Rollers

Designed to move a lot of weight quickly and easily. Up to 400 tons weight capacity with a low overall height.

Short But Tough Casters

CASTER WHEELS

What makes one wheel better than the other? How you use it is the best answer. A hard wheel has less "rolling resistance" and as a result may be easier to push or pull. However, a softer wheel glides over debris easier and is less likely to damage floors. A choice that is in the middle is Urethane on Nylon (UN). There are also other determining factors and choices in wheels like; chemical conditions, wet environments, food workplace. Even bearing options are important factors when choosing a wheel. Speak with one of our staff to help you make the best choice!

	Hi Temp (HT) A wide selection of High Temperature wheels made in a variety of ways are available. These are generally best suited for dry heat applications such as powder coating, bakery ovens and autoclaves. Capability ranges are up to 475° F for 30 minutes. Soft versions are an option as well.		Thermal Plastic Rubber (TP) New generation grey non-marking wheel bonded to thermoplastic core. Soft tread but high weight capacities. Clean running wheel with good chemical, oil, and acid resistance.
	Neoprene (XD) These quiet and easy rolling wheels are good for all floor surfaces. Wear and oil resistant. Shock absorbing, non-marking. Will reject floor debris such as screws, metal filings and glass.		Rubber Moldon (RM) Black solid cushion rubber tire bonded to cast steel wheel center. Provides an economical, quiet rolling wheel.
	Solid Elastomer (PSE) Quiet solid elastomer wheel. Ergonomically designed for medium loads (300-1800lbs). Excellent mobility and shock absorption. Ideal for continuous use and tow-lines. Tolerant of a wide range of chemicals.		Urethane on Cast Polyurethane formed on cast center. Good oil, chemical, and acid resistance. Will not take a compression set, and provides load ratings similar to steel wheels.
	Phenolic (PH) Fibre filled impregnated with phenolic resin and molded with extreme heat and pressure. Provides a hard smooth wheel with good corrosion resistance. High temperature (HT) available. Laminated Phenolic (LAM) available for better wear.		Swivel-EAZ (EZ) Carries twice the load of standard size wheels. Maintenance free for longer life. Non-marking high performance elastomer treads.
	Ductile Iron (DU) Heavy duty wheels for severe loads. Very resistant to breaking, cracking and chipping. Also referred to as malleable iron. Loads are distributed across the entire wheel for maximum floor protection. protection.		Urethane on Nylon (UN) Polyurethane tread bonded to a polypropylene core for high strength and light weight. Non marking wheel designed to meet the stringent requirements of clinical environments.
	V-Groove (VG) Made from Cast steel, these wheels are great for running along a piece of inverted angle iron or tubing as a guide. The load must still rest on the flat of the wheel tread. Ductile Iron (VG-DU) available.		PolyFlexon (UA) PolyFlexon wheel offers a semi-cushioned ride and is non-marking. Great for tow-line applications. Requires less effort to start-up and maintain a rolling load. (85A durometer)
	Flanged Wheel (FL) Cast Steel or Ductile Iron wheel designed to operate on a steel track. This wheel minimizes rolling effort and aids guidance Superior wear factor to V-Groove wheels Excellent for use on boat cradles and similar tracked applications.		Reinforced Thermoplastic (RT) High performance, durable and cost effective wheel generally suited for food processing, tool storage, sanitary maintenance and applications requiring heavy loads. High temperature (HT) available.

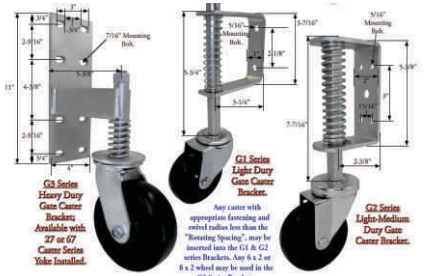

Please note: Not all wheel sizes or bearings types are available in all wheel materials. Some materials are better suited for certain applications than others. Product may not be exactly as pictured.

***Replacement parts for most casters, including bearings, bolts, and seals, are also available.**

Looking for a smooth rolling pneumatic, but concerned about flats?

Flat Free wheels offer the same advantages of pneumatic wheels without the possibility of them going flat. They provide a smooth cushioned ride, rolling easily over debris and small obstacles. A saw-tooth tread design offers a combination of traction and maneuverability. They are also available in casters and are perfect applications for hand trucks, dollies, carts and mobile equipment such as pressure washers, generators, etc.

Policies & Warranty Information

Product

Our full line of casters, wheels and glides are manufactured by some of the leading manufacturers in the industry. In addition to the products listed in this catalogue, many other products or special order items are available upon request. Please consult our order desk.

Limited Warranty: General Provisions

Casterland warrants to the original purchaser of its product that the product will be free from defects in material and workmanship for a period of 90 days after the date of delivery to the original purchaser. This limited warranty is not effective with respect to products that are not properly installed or not used in the proper application based on loads, speeds and other factors. This warranty does not apply to products damaged or destroyed as a result of shipping.

Freight Policy

All goods ordered from this catalogue are FOB our original purchase point warehouses and shipped via freight collect. Orders over \$500.00 may be eligible for a freight reduction of half the original freight cost to a major centre by a carrier of our choice. Any large orders or O.E.M. customers may be eligible for prepaid orders to a major centre by a carrier of our choice.

Pricing

Prices are subject to change without notice. Casterland makes an effort to hold prices for a minimum of one year, however, occasionally circumstances arise which are beyond our control.

Terms

We accept Visa, MasterCard, American Express, Debit, and net 30 days on approved credit. First Time orders may be subject to COD terms or a maximum charge amount depending on credit approval.

Hours of Operation

Casterland is open from 8am to 5pm weekdays. Some locations are open from 9am to 2pm on Saturdays. Please call the location nearest you for applicable hours of operation.

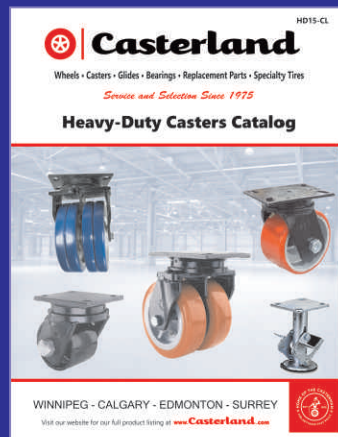

Visit our webstore at **www.Casterland.com** for application tips and 24 hour access to our products.
