# REMOVABLE DRY DIAL WOLTMANN WATER METER

Model LXLGC/LD-50-500E/C with pulser

# **Application**

Totalise the total volume of cold (hot) water passing through the pipeline. This type of water meter can also be used for remote reading transmission system as it is equipped with a built-in sensor.

# **Special Features**

- Measuring mechanism has three different types
- Removable element structure for ease of installation and maintenance
- Register for universal use within this range and detachable without removing meter from the pipeline
- Dry dial magnetic drive sensitive action with small pressure loss
- Roller counter with large central pointer type for easy reading
- Vacuum sealed water resistant register to prevent condensation
- Manufactured from the highest quality materials for reliability and prevention of corrosion

### **Maximum Permissable Error**

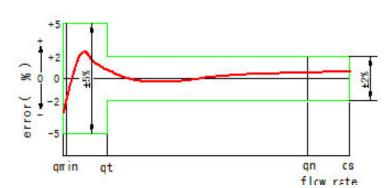

From transitional flow up to maximum flow both inclusive:

- ± 2% for cold water
- ± 3% for hot water

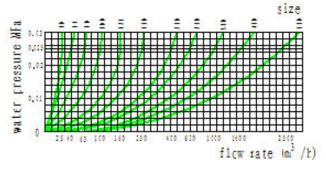

From minimum flow inclusive up to transitional flow: ± 5%

Technical data conforms to ISO 4064 Class B standards

#### **Pressure Loss Error Curve**

# **About Recycled Rain**

Recycled Rain is one of Australia's leading gas and water measurement and control distributors. Meters of the LianLi brand perform strictly as per ISO 4064 Class B, EEC Standard 75/33/EEC and National Standard GB/T778. LianLi's management systems are also certified to ISO 9001 and ISO 14001, the international standards for Quality and Environmental Management.
