Love your mattress

A quick guide to making the
most of your mattress

For the love of sleep

**REMOVE ALL PLASTIC PACKAGING AND DO
YOUR BEST TO RECYCLE!
AVOID THE RISK OF SUFFOCATION, KEEP ALL
PLASTIC BAGS AWAY FROM CHILDREN**

Hello new mattress!

We hope you are really pleased with your new mattress which has been lovingly made in Wiltshire by one of the UK's most well-known and respected bed makers.

Mattress Care

All mattresses need just a little TLC to make sure you always get the very best sleep possible – but also to preserve its longevity.

Before Use

After removing from the packaging, leave your new mattress to remain uncovered in a well-ventilated room to air. After 2 hours it will be ready for use.

Rolled Mattress

If you have purchased a rolled mattress please follow guidance above but note that over the next 72 hours, further recovery will take place where the mattress will reach its full height and comfort level.

Treat it kindly – do's and don'ts

DO air the mattress on a regular basis to help keep the comfort fillings and fabric fresh.

DO NOT attempt to bend or fold your mattress (even if originally rolled) as it'll likely cause it permanent damage.

DO NOT jump on your mattress as it'll also likely cause it irreparable damage.

DO NOT sit on the edge of your mattress over a prolonged period as this may cause compression of the fillings and damage the mattress wall.

DO NOT pull any threads as this could cause stitching to come undone. Any loose threads should be cut away with a pair of scissors.

Mattress Wear

The comfort fillings in your mattress are designed to flex to your body contours. To avoid premature wear on the fillings we recommend that every 3 months you either rotate the mattress from head to foot for **Non Turn** mattresses, or flip the mattress for **Turnable** mattresses.

Non Turn

Turnable

Cleaning

Should the surface need cleaning, it may be lightly sponged with a weak solution of soap and water.

Detergents or chemical cleaners are a definite no-no and should be avoided to prevent potential damage to the covering material.

Use a mattress protector to ensure your mattress remains in good condition.

If your mattress has a zipped cover, it is only to aid manufacture and is not removable for washing.
