

PROVACAN

CBD DOSING GUIDE

The following information is based on the recommended daily dose of 10mg of CBD.

There are approximately 300 drops in each Provacan CBD oil bottle.

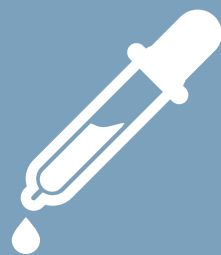

Is bigger always better? Not necessarily.

You might have noticed our Provacan tincture bottles are smaller (10ml) compared to the standard 30ml offered by other CBD brands. But here's the thing: size doesn't determine strength.

Our CBD is more concentrated per milliliter. Our full-spectrum CBD is derived from specially selected strains of organic hemp cultivated in the EU, enhancing the efficacy, meaning you require less to achieve the desired effect. To put it into perspective: drop for drop, Provacan's CBD oils are up to three times more potent than many other brands on the market.
