

Height of your keyboard makes a big difference in how your arms feel at the end of the long workday.

Elevate, tilt, swivel keyboard to the perfect position for you with our keyboard trays.

ADJUSTABLE KEYBOARD TRAYS

Easily adjust your keyboard and mouse to your correct ergonomic position. Raise keyboards to any height from 2 3/8 inch above " below your desk-level and 3 5/8 inch below desk level.

People get height adjustable keyboard trays because their desk top is too high to be comfortable when keying, and the height adjustable tray allows them to get the keyboard down to a comfortable level, alleviating "elevated shoulders and other awkward postures, which increases the risk for discomfort, fatigue and injury.

## About Product

Enjoy the ergonomic comfort that this keyboard mechanism will give you. When you tilt your keyboard you will notice how relaxed your wrist will feel. This value price mechanism is ideal for home and office. This classic style, knob adjusted, ergonomic keyboard mechanism will make a positive difference in the comfort of your workstation.
