

## Height Adjustable Movable Desk Table

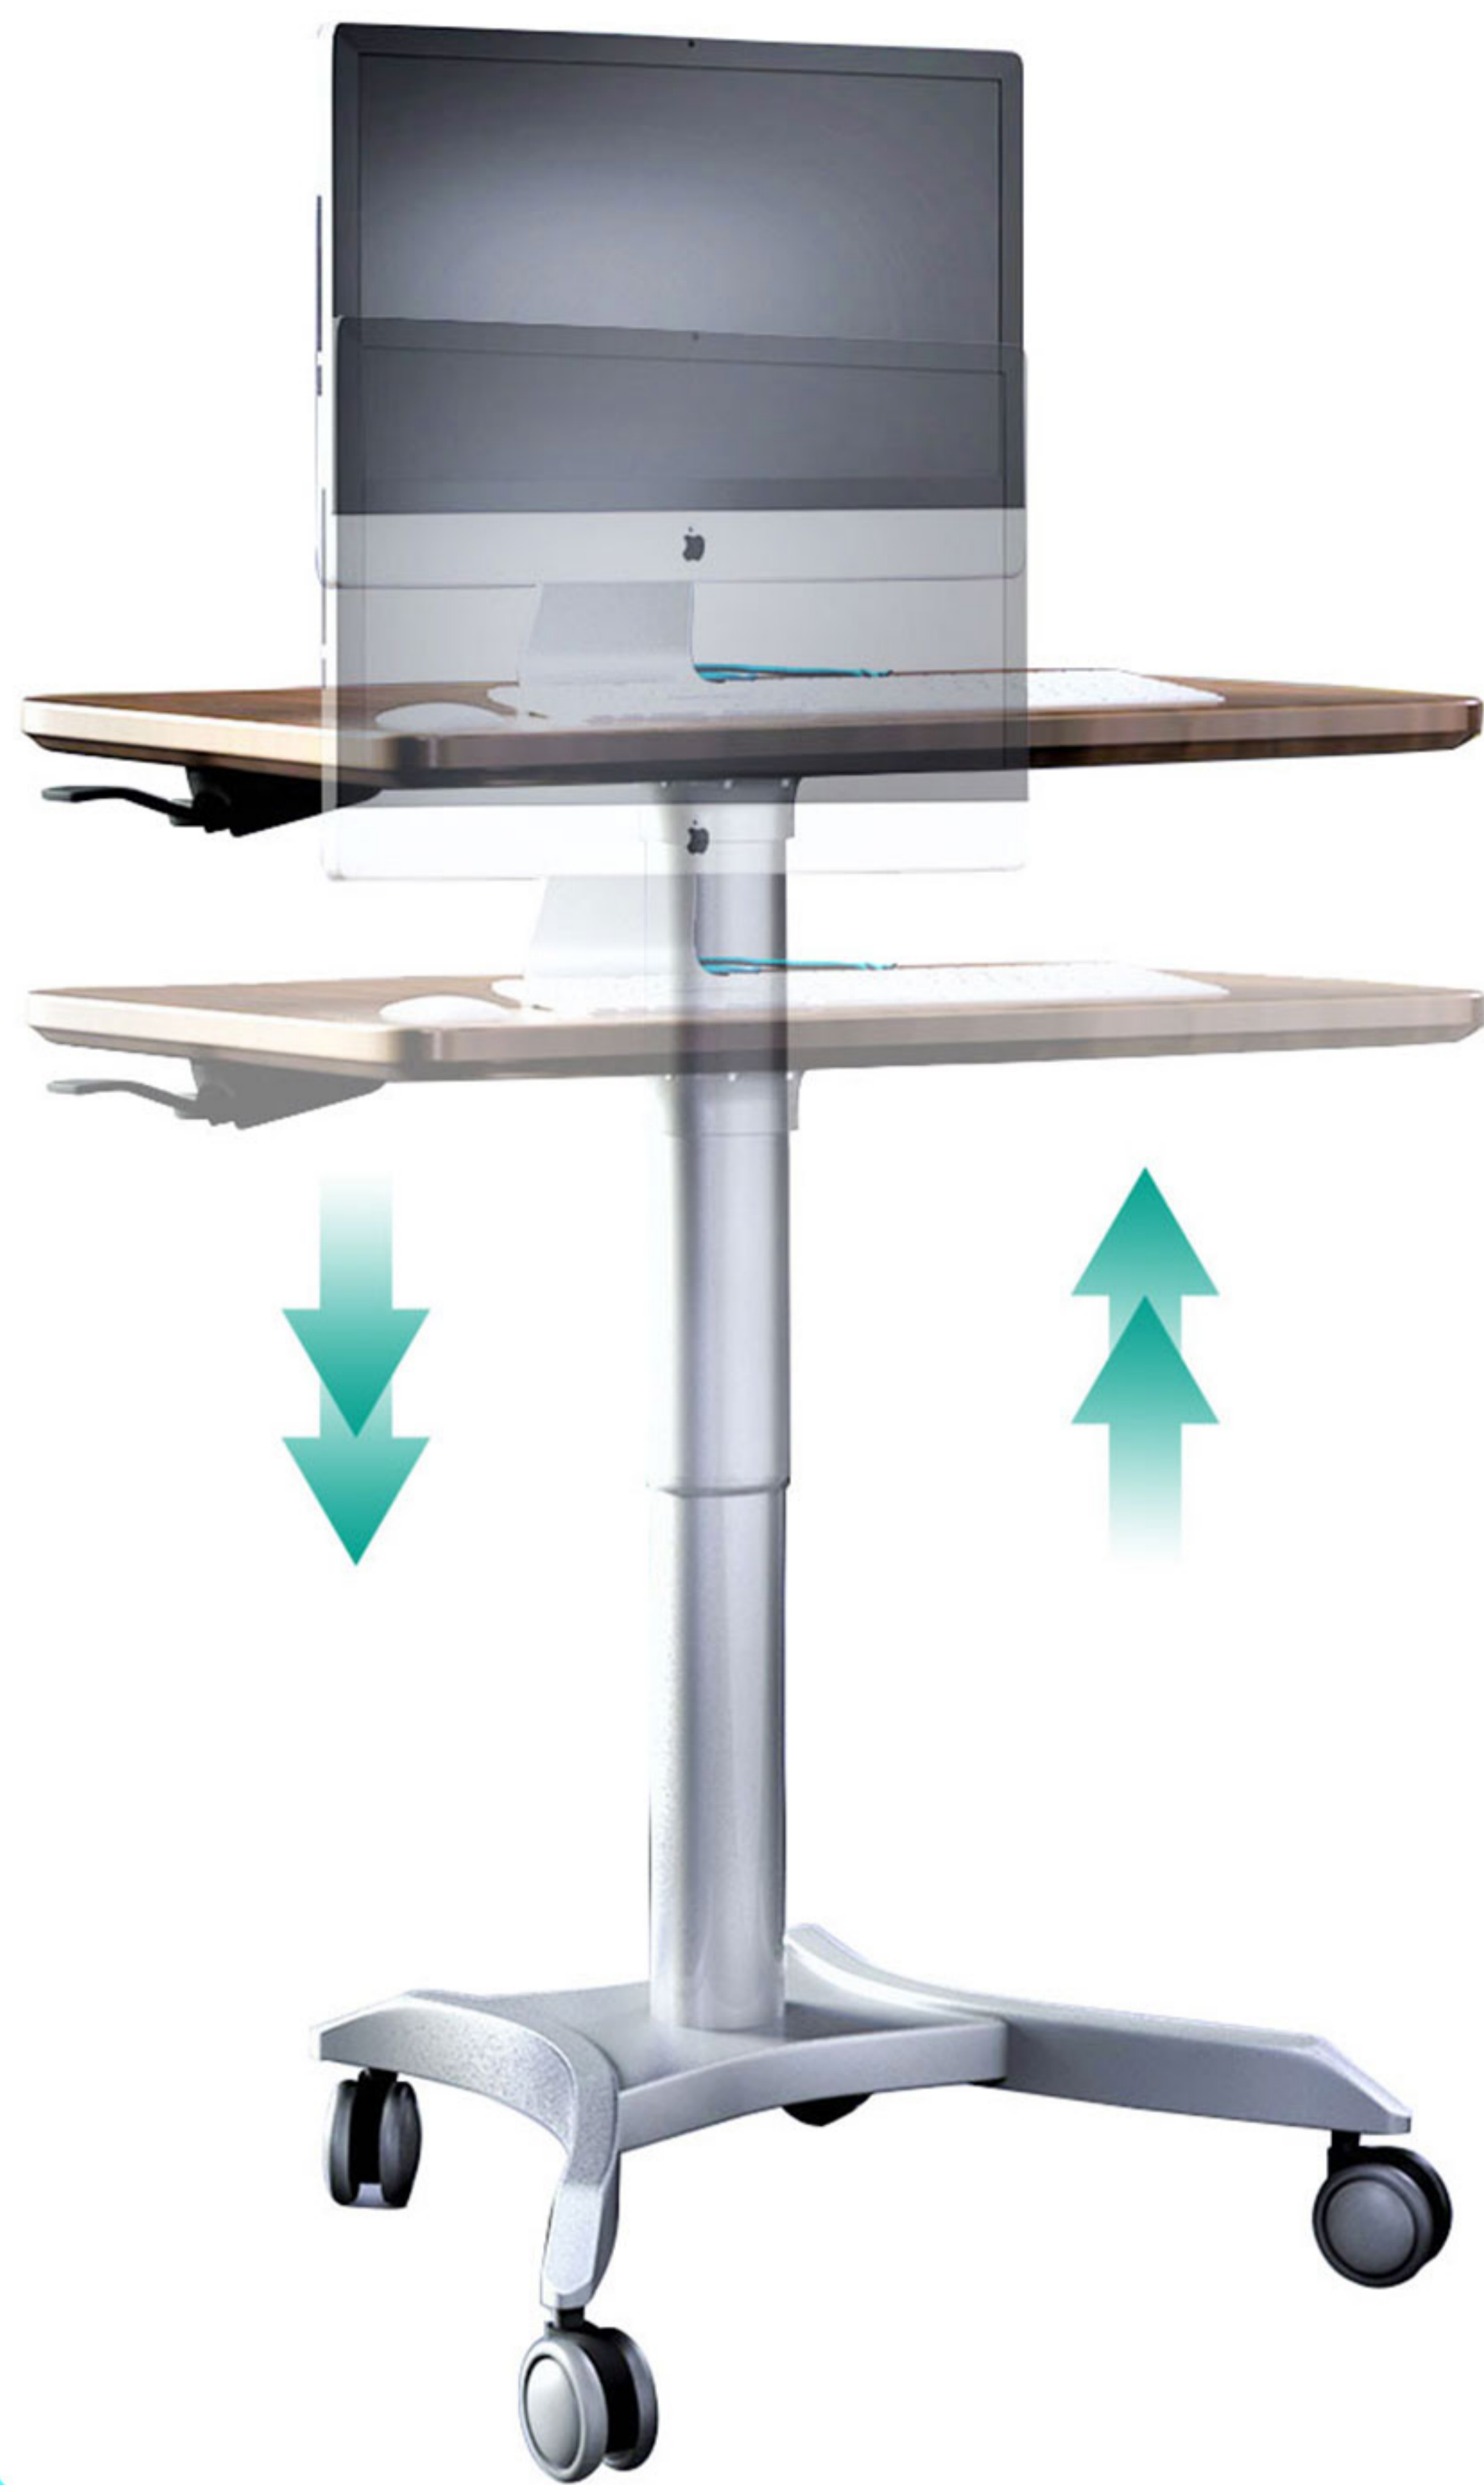

Ergonomic  
*Comfort & Style*

Being healthy begins with being comfortable. A 'hunched' or bent-over posture and long-term, high-intensity typing sessions can lead to fatigue in the wrists & hands as well as possible pain. A standing desk mitigates these by rising to support your natural standing position.

**LPTR**

**Adjustable & Fast:** Raise and lower the desk from 27.2" to 41.3" inches with the lever-operated air-powered cylinder.

**Enjoy smooth-gliding mobility** with four 2.4" caster swivel wheels (2 lockings). Simply screw wheels in for a portable workspace that stays put when you need it.

**Hold the handle up** which under the table to adjust the table up and down. The table will be stopped when release the handle.

- Ergonomic wood top (28" x 18.7") fits almost any size monitor, laptop, or tablet with keyboard

### **Standing Desks Health Benefits**

- Enables users to stay active and productive
- Standing burns more calories than sitting
- Can improve comfort in users with back pain

Desk features lightweight aluminum frame finished in satin pewter for long-term durability and easy-care. Perfect for professional environments like offices, art and music studios, libraries, and in dentist's, optometrist's and doctor's offices.

**H**elp reduce back and neck strains. Assists to fix your posture immediately. Whether you are sitting or standing, you can elegantly and silently adjust the table to an ergonomic height.
