receiving bundle

Streamline your Receiving Process with AHS Receiving Device Bundle

Are you facing challenges in your receiving process, from reading labels on incoming products to managing various quantity types and conducting quality checks? Say goodbye to receiving headaches with our comprehensive receiving device bundle designed with the equipment your team needs to modernize your operations.

CHALLENGES ADDRESSED

- **Reading Labels on Products**: Ensure accurate and efficient label scans for incoming products, eliminating errors and delays in the receiving process.
- **Receiving Various Quantity Types**: Solutions that can handle diverse quantity types, including bulk, cased, tank/liquid, and truckload shipments, with ease and precision.
- **Quality Checks**: Conduct thorough quality checks on incoming products with a portable device to maintain standards and efficiently process items from entering your inventory.
- **Put Away**: Efficiently capture put-away actions to track the appropriate locations within your warehouse or facility, minimizing handling and storage costs.

EQUIPMENT OPTIONS

- **Scanners**: High-performance barcode scanners for fast and accurate scanning of product labels, ensuring seamless identification and tracking of incoming items.
- **Mobile Computers**: Versatile vehicles, handheld, and tablet devices optimized for working with your receiving applications for real-time data capture and processing, enabling efficient receiving workflows.
- **Scales**: Precision scales for weighing incoming products, facilitating accurate quantity measurement and inventory management.
- **Industrial Printers**: Robust printers for generating barcode labels and documentation, supporting efficient labeling and tracking of received items.
- **Mobile Printers**: Portable printers for on-demand label printing, enhancing flexibility and convenience in labeling and documentation tasks.
- **BarTender® Software**: Advanced label design and printing software for creating customized labels with ease, ensuring compliance and clarity in labeling requirements.

BENEFITS

- Mobile solutions give you better control of QA and PO processes
- Greater receiving efficiency and accuracy
- Easy to use and train!
